ACKNOWLEDGEMENTS

It takes me some time to think about those who had helped me by any means during the whole research period leading to the preparation of this thesis. First of all, I gratefully thank the almighty (God) who has given me such a great chance to work for the Doctoral Degree. Then I am grateful to my father, Sh. Mahinder Singh, who had neglected the relatives on the ground of higher education of a girl child and helped me in completing my study up to this doctoral degree.

I express my thanks and acknowledgements with deep appreciation and gratitude to my Research Supervisor, Dr. Chandra Bhushan Singh for his all time invaluable, highly sagacious guidance and sustained personal support during the up and down moments during the research period. My supervisor has been consistently sharpening my edges while doing the work presented in the pages that follows.

I owe to a great deal the debt of gratitude to Prof. D Mukherjee, Prof. (Ms.) SR Gupta, Prof. A Aggarwal, Prof. NK Matta, Prof. BD Vashishta, Prof. N Singh, Dr. N Sood, Dr. Y Kumar and Dr. S Jakhad for their generous advices and encouragements.

I express sincere thanks to Prof. G Abraham and Prof. S Pabbi (Senior Scientists as well as programme coordinator at Centre for Conservation and Utilization of Blue Green Algae, Indian Agricultural Research Institute, New Delhi, India) for their multidimensional guidelines exploring different applications of blue green algae during a 21 days National level Training
programme (sponsored by DST, India) on ecological, physiological, biochemical and molecular aspects of cyanobacteria. The training programme had helped me in many ways in understanding my research work.

I also thank my collegues and fellow researchers, Dr. Neelam, Seema, Mansi, Suman, Anju, Alpa, Shiwani, Ravinder, Asha, Ekta, Pushpa, Puneet, Chhavi, Nisha, Neetu, Karishma and Pooja for their consistent help, discussions and co-operation.

My younger brother, Jagat Singh also deserves special attention with a lot of thanks for his valuable suggestions and support conducting the field analysis. My mother, Smt. Susheela Devi has helped me in many ways and for her time to time support, I gratefully acknowledge her. My little cute son, Ronit has brought a lot of smile on my face and a relaxation in my eyes which always gave me a break from the hours of stress and all these steered me to start my work afresh.I pay my everlasting thanks to my husband, Sh. Roop Raj for his constant encouragement, moral support as well as emotional help at each and every step of my present work. I sincerely thank and gratefully acknowledge my mother-in-law, Mrs. Chand Kaur Devi, for taking care of my child as well as my family during my research period. She was a constant source of encouragement for me, whenever I felt depressed or my efficiency became slow.

I gratefully acknowledge the Department of Botany for providing necessary facilities to conduct my research activities. I also thank to the non-teaching staff of the department for their all time help and cooperation. I also acknowledge the Department of Zoology for helping in the field related work. I am also thankful to the Department of Statistics for helping in the statistical analysis of my data. I also thank Kurukshetra Development Board for providing help in field analysis work.

(Laxmi Biban)
