ACKNOWLEDGEMENTS

This present humble work of mine which is being presented as my doctoral thesis would have still remained incomplete but for the kind, constant and creative encouragement from my guide Dr. V. P. Sharma, Professor and Head, Department of Psychology, Rashishankar University, Raipur. His vast knowledge and resourcefulness have not only enabled me to collect material from varied sources, hitherto beyond my reach, but also he timely helped me to shape and reshape it, so as to make it more and more meaningful and interpretative. In fact my indebtedness to him goes beyond any formality or verbosity except a deep sense of appreciation for his inspiration and enlightenment accorded by him at every stage of the present endeavour.

I also acknowledge my gratefulness to the Principals, teachers, students and their mothers, who have actively participated in the tests and helped directly or indirectly in the data collection for my research work.

I extend my sincere thanks to Shri O.P. Kashyap and Diwakar Sharma for the help rendered in tabulation and processing of data.

I shall fail in my duty if I do not thank Shri Y.K. Garg and Smt. V. Garg for the assistance which is beyond description.

I am indebted to my husband Shri N.N. Sharma, children Nitu and Chaitanya who bore all difficulties to help me in completing my work.

Thanks are also due to Shri T.V. Divakaran for his impressive and elegant typing of this thesis.

(Kamlesh Sharma)
