

LIST OF TABLES

Table No.	Title	Page
1	Gender differences in work participation - 2001	4
2	Work Participation Rates and Number of Workers in Tamil Nadu and India.	5
3	Gross Domestic Product Growth by Sector	7
4	Credit Growth rate by sector, October 2006, per cent, year on year.	7
5	Overall employment growth rates, per cent	8
6	Training Conducted in Various Countries	34
7	Personal, Social and Educational Background of Construction Workers	61
8	Residence and Transportation of Workers	63
9	Harassment of Married Women Construction Workers at Home	64
10	Facilities at Work for Women Construction Workers	64
11	Harassment of Women Construction Workers at Workplace	65
12	Discrimination in Wages and Work	67
13	Discrimination in Promotional Opportunities	69
14	Other characteristics of men and women construction workers	70
15	Status of Spouse of Men Construction Workers	71
16	Involvement of Construction Workers in Union Activities	71
17	Spending of Income by Women and Men Construction Workers	72
18	Socio Demographic Characteristics Of Contractors	74
19	Union Details and Hours of Work by Contractors	76
20	Major Problem of Women Construction Workers (opinion of Contractors)	76
21	Independent Samples T Test for Area and Wages, Age, Family Income, Experience, Days of work and Distance home (Women Construction workers)	77
22	Independent Samples T Test for Contract type and Wages, Age, Family Income, Education, Experience, Days of work and Distance home (Women Construction workers)	77
23	Independent Samples T Test for Native and Wages, Age, Family income, Experience, Days of work and Distance home (Women Construction workers)	78
24	Independent Samples T Test for Only Earning member and Wages, Age, Family income, Education, Experience, Days of work and Distance home (Women Construction workers)	78
25	Independent Samples T Test for Literacy and Wages, Age, Family income, Experience, Days of work and Distance home (Women Construction workers)	78

Table No.	Title	Page
26	Independent Samples T Test for Contractor and Wages, Age, Family Income, Education, Experience, Days of work and Distance home (Women Construction workers)	79
27	One way analysis of variance for age and days of work	80
28	One way analysis of variance for distance from home	81
29	One way analysis of variance for family income	82
30	Independent Samples T Test for Gender and Wages, Age, Family Income, Experience, Days of work and Education	83
31	Impact of Gender on Marital Status	83
32	Chi-square for Gender on Marital Status	83
33	Impact of Gender on Contract Type	84
34	Chi-square for Gender on Contract Type	84
35	Impact of Gender on Age	85
36	Chi-square for Gender on Age	85
37	Impact of Gender on Native	86
38	Chi-square for Gender on Native	86
39	Impact of Gender on Residence	86
40	Chi-square for Gender on Residence	87
41	Impact of Gender on Community	87
42	Chi-square for Gender on Community	88
43	Impact of Gender on Literacy	88
44	Chi-square for Gender on Literacy	88
45	Impact of Gender on Only Earning Member	89
46	Chi-square for Gender on Only Earning Member	89
47	Impact of Gender on Dependants	90
48	Chi-square for Gender on Dependants	90
49	Impact of Gender on Reason for Entry into construction work	91
50	Chi-square for Gender on Reason for Entry into construction work	91
51	Impact of Gender on Contractor type	92
52	Chi-square for Gender on Contractor Type	92
53	Impact of Gender on Experience	92
54	Chi-square for Gender on Experience	93
55	Impact of Gender on Union Awareness	93
56	Chi-square for Gender on Union Awareness	93
57	Impact of Gender on opinion about Contractor Attitude	94
58	Chi-square for Gender on Contractor Attitude	94
59	Impact of Gender on Distance from Home	95
60	Chi-square for Gender on Distance from Home	95
61	Impact of Area on opinion of Women Construction Workers of Inequality among Construction Workers	96
62	Chi-square for Area on opinion of Women Construction Workers of Inequality among Construction Workers	96

Table No.	Title	Page
63	Impact of Contract Type on opinion of Women Construction Workers of Inequality among Construction Workers	97
64	Chi-square for Contract Type on opinion of Women Construction Workers of Inequality among Construction Workers	97
65	Impact of Contractor type on opinion of Women Construction Workers of Inequality among Construction Workers	98
66	Chi-square for Contractor type on opinion of Women Construction Workers of Inequality among Construction Workers	99
67	Impact of opinion of Women Construction Workers to become skilled mason on opinion of Inequality among Construction Workers	99
68	Chi-square for opinion of Women Construction Workers to become skilled mason on opinion of Inequality among Construction Workers	100
69	Binary Logistic Regression - R Square – Opinion of women about Inequality of women construction workers	100
70	Binary Logistic Regression for Opinion of women about Inequality of women construction workers	101
71	Impact of Contract type on opinion of Men Construction Workers of Inequality among Construction Workers	102
72	Chi-square for Contract Type on opinion of Men Construction Workers of Inequality among Construction Workers	103
73	Impact of Community on opinion of Men Construction Workers of Inequality among Construction Workers	103
74	Chi-square for Community on opinion of Men Construction Workers of Inequality among Construction Workers	104
75	Impact of Family Income on opinion of Men Construction Workers of Inequality among Construction Workers	104
76	Chi-square for Family Income on opinion of Men Construction Workers of Inequality among Construction Workers	105
77	Impact of Experience on opinion of Men Construction Workers of Inequality among Construction Workers	105
78	Chi-square for Experience on opinion of Men Construction Workers of Inequality among Construction Workers	106
79	Impact of Job Title on opinion of Men Construction Workers of Inequality among Construction Workers	106
80	Chi-square for Job Title on opinion of Men Construction Workers of Inequality among Construction Workers	107

Table No.	Title	Page
81	Impact of Number of Dependants on opinion of Men Construction Workers of Inequality among Construction Workers	107
82	Chi-square for Number of Dependants on opinion of Men Construction Workers of Inequality among Construction Workers	108
83	Impact of Literacy on opinion of Men Construction Workers of Inequality among Construction Workers	108
84	Chi-square for literacy on opinion of Men Construction Workers of Inequality among Construction Workers	109
85	Binary Logistic Regression - R Square - Opinion about Inequality by Men Construction Workers	109
86	Binary Logistic Regression: Dependent variable - opinion about inequality by men construction workers	110
87	Contractors on opinion about inequality	111
88	One way analysis of variance for wages	112
89	Independent Samples T Test for Gender and Wages	112
90	Regression - R Square - Wages of Men and Women Construction Workers	113
91	Regression - Wages of Men and Women Construction Workers	113
92	Regression - Significance - Wages of Men and Women Construction Workers	114
93	Measurement Values for Variables - Wages of Men and Women Construction Workers	114
94	Regression - R Square - Wages of Men Construction Workers	115
95	Regression - Significance - Wages of Men Construction Workers	116
96	Regression - Beta - Significance – (Wages of Men)	116
97	Measurement Values for Variables - Wages of Men Construction Workers	116
98	Regression - R Square - Wages of Women Construction Workers	117
99	Regression - Significance - Wages of Women Construction Workers	118
100	Regression - Beta - Significance – (Wages of Women Construction Workers)	118
101	Measurement Values for Variables - Wages of Women Construction Workers	119
102	Barriers for Women not being Promoted as Masons	120
103	Reasons for Encouraging Women to do Masonry job	121
104	Impact of Area on willingness to be trained as masons (Women Construction Workers)	122

Table No.	Title	Page
105	Chi-Square for Area on willingness to be trained as masons (Women Construction Workers)	122
106	Impact of Construction type on willingness to be trained as masons (Women Construction Workers)	123
107	Chi-square for Construction Type on willingness to be trained as masons (Women Construction Workers)	123
108	Impact of Contract type on willingness to be trained as masons (Women Construction Workers)	124
109	Chi-square for Contract Type on willingness to be trained as masons (Women Construction Workers)	124
110	Impact of Marital status on willingness to be trained as masons (Women Construction Workers)	125
111	Chi-square for Marital status on willingness to be trained as masons (Women Construction Workers)	125
112	Impact of Native on willingness to be trained as masons (Women Construction Workers)	126
113	Chi-square for Native on willingness to be trained as masons (Women Construction Workers)	126
114	Impact of Residence on Willingness to Be Trained As Masons (Women Construction Workers)	127
115	Chi-square for Residence on Willingness to Be Trained As Masons (Women Construction Workers)	127
116	Impact of Community on Willingness to Be Trained As Masons (Women Construction Workers)	128
117	Chi-square for Community on Willingness to Be Trained As Masons (Women Construction Workers)	128
118	Impact of Only Earning member on Willingness to Be Trained As Masons (Women Construction Workers)	129
119	Chi-square for Only Earning member on Willingness to Be Trained As Masons (Women Construction Workers)	129
120	Impact of Literacy on Willingness to Be Trained As Masons (Women Construction Workers)	130
121	Chi-square for Literacy on Willingness to Be Trained As Masons (Women Construction Workers)	130
122	Impact of Education on Willingness to Be Trained As Masons (Women Construction Workers)	131
123	Chi-square for Education on Willingness to Be Trained As Masons (Women Construction Workers)	131
124	Impact of Contractor on Willingness to Be Trained As Masons (Women Construction Workers)	132
125	Chi-square for Contractor on Willingness to Be Trained As Masons (Women Construction Workers)	132

Table No.	Title	Page
126	Impact of Married/Unmarried on Willingness to Be Trained As Masons (Women Construction Workers)	133
127	Chi-square for Married/Unmarried on Willingness to Be Trained As Masons (Women Construction Workers)	133
128	Impact of opinion on Men workers Acceptance on Willingness to Be Trained As Masons (Women Construction Workers)	134
129	Chi-square for Men workers Acceptance on Willingness to Be Trained As Masons (Women Construction Workers)	134
130	Impact of opinion of Women Construction Workers of Inequality among Construction Workers on Willingness to Be Trained As Masons	135
131	Chi-square for opinion of Women Construction Workers of Inequality among Construction Workers on Willingness to Be Trained As Masons	135
132	Binary logistic regression - R Square - Willingness of Women Construction Workers to be Trained	136
133	Binary Logistic Regression: Dependent variable - Willingness of Women Construction Workers to be trained	137
134	Impact of Construction Type on Mason Work Tried (Women Construction Workers)	138
135	Chi-square for Construction Type on Mason Work Tried (Women Construction Workers)	138
136	Impact of Contract Type on Mason Work Tried (Women Construction Workers)	139
137	Chi-square for Contract Type on Mason Work Tried (Women Construction Workers)	139
138	Impact of Community on Mason Work Tried (Women Construction Workers)	140
139	Chi-square for Community on Mason Work Tried (Women Construction Workers)	140
140	Impact of Only Earning member on Mason Work Tried (Women Construction Workers)	140
141	Chi-square for Only Earning member on Mason Work Tried (Women Construction Workers)	141
142	Impact of Literacy on Mason Work Tried (Women Construction Workers)	141
143	Chi-square for Literacy on Mason Work Tried (Women Construction Workers)	142
144	Impact of Contractor type on Mason Work Tried (Women Construction Workers)	142
145	Chi-square for Contractor type on Mason Work Tried (Women Construction Workers)	142

Table No.	Title	Page
146	Impact of Union Member on Mason Work Tried (Women Construction Workers)	143
147	Chi-square for Union Member on Mason Work Tried (Women Construction Workers)	143
148	Binary Logistic Regression - R Square – for Mason Work Tried (Women Construction Workers)	144
149	Binary Logistic Regression: Dependent variable - Willingness of Women Construction Workers to be trained	145
150	Impact of Area on Willingness to become Skilled Mason (Women Construction Workers)	146
151	Chi-square for Area on Willingness to become Skilled Mason (Women Construction Workers)	146
152	Impact of Contract Type on Willingness to become Skilled Mason (Women Construction Workers)	147
153	Chi-square for Contract Type on Willingness to become Skilled Mason (Women Construction Workers)	147
154	Impact of Native on Willingness to become Skilled Mason (Women Construction Workers)	148
155	Chi-square for Native on Willingness to become Skilled Mason (Women Construction Workers)	148
156	Impact of Residence on Willingness to become Skilled Mason (Women Construction Workers)	149
157	Chi-square for Residence on Willingness to become Skilled Mason (Women Construction Workers)	149
158	Impact of Literacy on Willingness to become Skilled Mason (Women Construction Workers)	150
159	Chi-square for Literacy on Willingness to become Skilled Mason (Women Construction Workers)	150
160	Impact of Education on Willingness to become Skilled Mason (Women Construction Workers)	151
161	Chi-square for Education on Willingness to become Skilled Mason (Women Construction Workers)	151
162	Impact of Contractor type on Willingness to become Skilled Mason (Women Construction Workers)	152
163	Chi-square for Contractor type on Willingness to become Skilled Mason (Women Construction Workers)	152
164	Impact of Men mason acceptance on Willingness to become Skilled Mason (Women Construction Workers)	153
165	Chi-square for Men mason acceptance on Willingness to become Skilled Mason (Women Construction Workers)	153
166	Impact of Seeing women do mason' work on Willingness to become Skilled Mason (Women Construction Workers)	154
167	Chi-square for Seeing women do mason' work on Willingness to become Skilled Mason (Women Workers)	154

Table No.	Title	Page
168	Binary Logistic Regression - R Square – for Willingness of Women Construction Workers to become skilled masons	155
169	Binary Logistic Regression: Dependent variable for Willingness of Women Construction Workers to become skilled masons	156
170	Opinion about obedience of women by contractors	157
171	Opinion if women are trainable by contractors	157
172	Opinion of long term loyalty of workers by contractors	158
173	Impact of Area on Willingness of men to Train Women Construction Workers as masons	159
174	Chi-Square for Area on Willingness of men to Train Women Construction Workers as masons	160
175	Impact of Contract Type on Willingness of men to Train Women Construction Workers as masons	160
176	Chi-Square for Contract Type on Willingness of men to Train Women Construction Workers as masons	161
177	Impact of Wife Working on Willingness of men to Train Women Construction Workers as masons	161
178	Chi-Square for Wife Working on Willingness of men to Train Women Construction Workers as masons	162
179	Impact of Residence on Willingness of men to Train Women Construction Workers as masons	162
180	Chi-Square for Residence on Willingness of men to Train Women Construction Workers as masons	163
181	Impact of Community on Willingness to Train Women Construction Workers as masons	163
182	Chi-Square for Community on Willingness of men to Train Women Construction Workers as masons	164
183	Impact of Entry Why on Willingness of men Construction Workers to Train Women as masons	164
184	Chi-Square for Entry Why on Willingness of men to Train Women Construction Workers as masons	165
185	Impact of Experience on Willingness to Train Women Construction Workers as masons	165
186	Chi-Square for Experience on Willingness of men to Train Women Construction Workers as masons	165
187	Impact of Union Awareness on Willingness of men to Train Women Construction Workers as masons	166
188	Chi-Square for Union Awareness on Willingness of men to Train Women Construction Workers as masons	166
189	Impact of Union Member on Willingness to Train Women Construction Workers as masons	167
190	Chi-Square for Union Member on Willingness to Train Women Construction Workers as masons	167

Table No.	Title	Page
191	Impact of Experience on Willingness of Men Masons to Train Women Construction Workers as Masons	168
192	Binary Logistic Regression - R Square - Willingness of Men Construction Workers to Train Women Construction Workers as masons	169
193	Binary Logistic Regression: Dependent variable - Willingness of Women Construction Workers to be trained	169
194	Impact of Qualification on opinion that women can become skilled masons (Contractors)	172
195	Impact of Entry Why on Opinion of Men Construction Workers that women can become skilled masons	173
196	Impact of Experience on Opinion of Men Construction Workers that women can become skilled masons	173
197	Impact of Area on Opinion Of Men Construction Workers that women can become Skilled Masons.	174
198	Chi-square for Area on Opinion of Men Construction Workers that women can become skilled masons	174
199	Impact of Age on Opinion of Men Construction Workers that women can become skilled masons	175
200	Chi-square for Age on Opinion of Men Construction Workers that women can become skilled masons	175
201	Impact of Native on Opinion of Men Construction Workers that women can become skilled masons	176
202	Chi-square for Native on Opinion of Men Construction Workers that women can become skilled masons	176
203	Impact of Residence on Opinion of Men Construction Workers that women can become skilled masons	177
204	Chi-square for Residence on Opinion of Men Construction Workers that women can become skilled masons	177
205	Impact of Community on Opinion of Men Construction Workers that women can become skilled masons	178
206	Chi-square for Community on Opinion of Men Construction Workers That women can become skilled masons	178
207	Impact of Other work on Opinion of Men Construction Workers that women can become skilled masons	179
208	Chi-square for Other work on Opinion of Men Construction Workers that women can become skilled masons	179
209	Impact of family income on Opinion of Men Construction Workers that women can become skilled masons	180
210	Chi-square for Family income on Opinion of Men Construction Workers that women can become skilled masons	180
211	Impact of Job Title on Opinion of Men Construction Workers that women can become skilled masons	181

Table No.	Title	Page
212	Chi-square for Job Title on Opinion of Men Construction Workers that women can become skilled masons	181
213	Impact of Union Awareness on Opinion of Men Construction Workers that women can become skilled masons	182
214	Chi-square for Union Awareness on Opinion of Men Construction Workers that women can become skilled masons	182
215	Impact of Union Member on Opinion of Men Construction Workers that women can become skilled masons	183
216	Chi-square for Union Member on Opinion of Men Construction Workers that women can become skilled masons	183
217	Impact of Age of Contractors on opinion that women can become skilled masons	184
218	Chi-square for Age of Contractors on opinion that women can become skilled masons	184
219	Binary Logistic Regression - R Square - Opinion Of Men Construction Workers that women can become Skilled Masons	185
220	Binary Logistic Regression: Dependent variable - Opinion of Men Construction Workers that women can become Skilled Masons	186
221	Impact of Community on Women Mason Acceptance (Men construction workers)	187
222	Impact of Area on Women Mason Acceptance (Men construction workers)	188
223	Chi-square for Area on Women Mason Acceptance (Men construction workers).	188
224	Impact of Construction Type on Women Mason Acceptance (Men construction workers)	189
225	Chi-square for Construction Type on Women Mason Acceptance (Men construction workers)	189
226	Impact of Age on Women Mason Acceptance (Men construction workers).	190
227	Chi-square for Age on Women Mason Acceptance (Men construction workers)	190
228	Impact of Native on Women Mason Acceptance (Men construction workers)	191
229	Chi-square for Native on Women Mason Acceptance (Men construction workers).	191
230	Impact of Family Income on Women Mason Acceptance (Men construction workers)	192

Table No.	Title	Page
231	Chi-square for Family Income on Women Mason Acceptance (Men construction workers)	192
232	Impact of Contractor type on Women Mason Acceptance. (Men construction workers)	193
233	Chi-square for Contractor type on Women Mason Acceptance (Men construction workers).	193
234	Impact of Experience on Women Mason Acceptance (Men construction workers)	194
235	Chi-square for Experience on Women Mason Acceptance (Men construction workers)	194
236	Impact of Job Title on Women Mason Acceptance (Men construction workers).	195
237	Chi-square for Job Title on Women Mason Acceptance (Men construction workers)	195
238	Impact of Union Awareness on Women Mason Acceptance (Men construction workers)	196
239	Chi-square for Union Awareness on Women Mason Acceptance (Men construction workers).	196
240	Impact of Union Membership on Women Mason Acceptance (Men construction workers)	197
241	Chi-square for Union Membership on Women Mason Acceptance (Men construction workers)	197
242	Binary Logistic Regression - R Square - Men Construction workers Acceptance of Skilled Women Mason	198
243	Binary Logistic Regression: Dependent variable - Men Construction workers acceptance of skilled women mason	199
244	Binary Logistic Regression - R Square - Masons Acceptance of Skilled Women Mason	200
245	Binary Logistic Regression: Dependant variable – Masons acceptance of skilled women mason	201
246	Daily work of Women Construction Workers	202
247	Mason work tried by Women Construction Workers	203
248	Training given to Men Construction Workers	204
249	Time Taken By Men Workers to Become Masons	204
250	Method of Training Women Construction Workers as Masons	205
