ACKNOWLEDGMENT

At the outset, I would like to thank the Almighty God and savior JESUS CHRIST for showering His grace to pursue my research in this field and successfully complete my dissertation.

The formative years of this thesis vows its gratitude to the initiation by my Guide, Dr. Niren Andrew. Throughout my work his guidance, insight and staunch support helped me progress speedily through my work.

I place on record my indebtedness to Prof. Dr.T.Sundaraj and his wife Mrs. Aswathi Sundaraj for unstinted cooperation, and sustained support all the way.

I’m deeply appreciative of Prof. Dr.Murugesan, Indian Institute of Technology, whose congeniality and benevolence helped me procure samples very essential for this research. This research would never have seen the end had it not been for the valuable contribution by way of the statistical data entry by Prof. Dr. Ravananan, Presidency College and Prof. Dr. Joshua, Head, department of statistics, Madras Christian College.

Being in the academic profession always on toes with the pressure of heading a department the shape of this thesis could not have taken place without my beloved student Mrs.Lali Growther, who from phase one was always generous with time and labour to carry out tasks associated with this research. The perfection and satisfaction that would accompany the successful completion of any task could be incomplete without the mention of my beloved friend Mrs.Mary Ruby Bella whose constant encouragement crowns all efforts.

Any research cannot be undertaken without well wishers and well meaningful friends. I would like to place on records my sincere thanks to my well wisher, Prof.N.Bindu, whose guidance and support stood a long way in this journey of completing my work. At Madras Christian College my colleagues within the department and outside will always be remembered for their kind words and encouragement. I also extend my heart felt thanks to Mr.M.P.Bensihar, Mr.D.Rajendran and Mr.T.K.Sekar, Lab technicians, Department of Microbiology, Madras Christian College for their willingness to help me whenever needed.
The journey of education to have reached this point in my life has to be dedicated to my loving husband Mr.R.N-Packiyanathan and my son Master P.Nirooban, parents Mrs. & Mr. P.Velraj, my loving elder sister Mrs.G.Saradha, who helped proof read and align this thesis and to my adorable younger sisters, Mrs.S.Bhuvaneswari, Mrs.V. Srividhya for always conceding to help me when I needed it.

This research has opened new annals of wisdom and hope intense research would continue to discover other vistas of knowledge. All knowledge passes through trials and tribulations to finally anchor on a truth, be on prejudices and myopic understanding.
