ACKNOWLEDGEMENT

"Beauty is God’s handwriting"

At the outset, I thank the God for made everything beautifully in its time and giving me the strength and guidance throughout my research endeavor.

I wish to record my sincere thanks to Vice-chancellor, Registrar, the Director, staff of Research and Development Centre, Head and the staff of Department of Mathematics of Bharathiyar University, Coimbatore for extending their fullest co-operation whenever needed.

I am very much indebted to the Management, Principal and the staff of Department of Mathematics of Saraswathi Narayanan College, Madurai-625 018 for all their help during my research and generously permitting me to make use of the facilities available in their institution.

I am extremely grateful to my guide Dr. V. Swaminathan for accepting me as his research scholar. Under his valuable guidance and illuminated exposure of his profound knowledge, I was able to carry on my task force without any abstraction and strain. The depth and range of the insight of my supervisor in this thesis is so profound that words and expressions are
insufficient to record the debt of my gratitude. My guide is not only my master, but also a father, philosopher and inspiring Guru. Besides supervising my research work, he has moulded my behaviour and fashioned my attitude. The inspiring guidance, infinite patience, incessant encouragement and help that he extended to me were profuse. His soft nature and accessibility, gentle manners and deep knowledge make him endeared to any who is in contact with him. He has helped me to establish good contact with some top researchers in the field of Graph Theory. I am fortunate and blessed for being his student at this period of time. I must say that, this research work should not have been possible but for his guidance and encouragement.

I wholeheartedly wish to express my deep sense of gratitude to Dr. (Mrs) Lalitha Swaminathan, the spouse of my supervisor for her motherly affection, encouragement, affection, care, keen interest and for the homely treatment I received during research discussions at their home. In addition to these, she has shown an exceptional kindness which I am bound to remember. I am also thankful to Mrs. Sowmya Jayaganesan and Mr. S. Neelakantan, the daughter and son of my guide for their supportive conversation.

I express my indebtedness to Dr. Jayalakshmi Venkatesan and Dr. Janaki Arunan, sisters-in-law of my guide for their affection and continuous encouragement during my research period.

I thank Dr. P. Amalorpavamary, Head (Rtd), P.G Department of
Mathematics, Fatima College, Madurai in a special manner for helpful suggestions and homely treatment I received during the special research discussions at her home.

I do not find words to express my thanks to the co-researcher and my friend Mr. R. Ramar. He used to actively take part and contribute a lot in the research discussions that I had in the presence of my guide. His assistance in computerizing the manuscript is something great.

A special words of thanks to Dr. S. Balamurugan, Assistant Professor, Department of Mathematics, R.D.M. Government Arts College, Sivagangai and Mr. L. Muthusubramanian, Assistant Professor, Department of Mathematics, Sethu Institute of Technology, Kariyapatti for giving all kinds of support for the progress of my research work.

I thank all the research scholars of my guide for their the invaluable help and unfailing co-operation and useful suggestions.

I am highly indebted to my colleague, Mrs. Kalyani Bose, Correspondent, Kalyani Nursery and Primary School, Kallal, for her motherly affection, continuous support and encouragement.

What I am today is entirely due to my parents, Mr. A. Periyakarupan, who is living only in my memory and Mrs. P. Gomathy. I could not verbalize and express my gratitude to my beloved mother for her countless help and
prayers. She lost her husband in the early stage of her life and brought me up with boundless love, spiritual care and constant encouragement in all my academic endeavors. Inspite of her advanced age and ailments, she continues to shower her blessings in my progress. While offering my gratitude at her feet, I also pray for her health and support. **It is to her that I dedicate this thesis.**

The All-encompassing and Full fledged co-operation of my God gifted better half **V. Vinothini** would remain etched in my memory for ever. She not only showers her love and affection on me but also feels one with me with her enthusiasm and constant encouragement on every stage of my progress. Definitely this work could not have been complete without the full support of her. I thankfully remember her for moral support, kind help at every level understanding, constant encouragements at all times, even while I was often away pre-occupied with this work. Further, the love and affection showered by my loving son, **J. Heam Prajayaesh** has always pushed me to achieve greater things in life. He is mature enough to tolerate my absence and my inability to take adequate care of him for days together during the period of my research. My love and affection go in abundance to him.

It is my bounden duty to express heartfelt thanks and gratitude to my sibling **P. Jayapiriya**, brother-in-law **B. Parthasarathy** and niece **P. Sushmitha**, and **J. P. Remuki** who rejoiced in helping me during my research work and who considered my efforts as their efforts. I always thank-
fully remember them for strong encouragement and genuine support throughout my life.

Words can not adequately express my debt of gratitude to my uncle S.V. Jayaraman and his family, brother Dr. S. Raja, Research Department of Mathematics, C.P.A. College, Bodinayakanur and his family for generating in me a perennial interest in research. It is they, who prepared the soil, sown the seeds of research, nurtured and cherished research thoughts in me. I express my heartfelt gratitude to them.

I will be failing in my duty if I don’t thank Mrs. Poovathy Arumugam, Mrs. Vathsala Chandrasekaran and Mrs. R. Rajalaksmi. I thankfully remember their invaluable help during my early stage of my school and college days.

Finally, to The Ultimate Fountain of Wisdom who sustains me through troubled and triumphant times, my humble offering of thanks.

I humbly submit this thesis on the lotus feet of my presiding Deity Lord Maruthamalai Murugan.

(P. Jayaprakash)
