ACKNOWLEDGEMENT

It is a great pleasure to acknowledge the guidance and encouragement offered to me by Dr. M.N. Qureshy, Assistant Director, National Geophysical Research Institute, at whose suggestion the project on which the thesis is based was undertaken.

I express my gratitude to Dr. B.P. Radhakrishna, Director, Department of Mines and Geology, Bangalore and Prof. F. Ahmed, Head of the Department of Geology, Muslim University, Aligarh, for their encouragement, suggestions and review of the manuscript.

I am highly obliged to Dr. Hari Narain, Director, National Geophysical Research Institute, for providing the facilities and allowing to submit this work as Ph.D. thesis.

I am thankful to Prof. R.C. Sinha, Head of the Department of Geology, Patna University for introducing me to geochemistry.

I am grateful to Dr. S.M. Casshyap, Lecturer, Department of Geology, Muslim University, Aligarh, and my colleagues Dr. V.D. Rao, Dr. N.K. Brahman, Mr. S.C. Bhatia and Mr. Iqbal Hasnain, for their help and valuable suggestions; to Mr. D. D. Sharma for programming and running the data over the IBM Computer; to Mr. Asghar Ali for carrying out the elevation survey; to Mr. Noorullah Hussaini and Mr. Madoom Hussain for typing; to Mr. Vijayanandam and Mr. Jaffer Ali for drawing the figures and maps and to Mr. R. Acharya for photographic developing and printing.

Date: 5.6.76
