SECTION ONE
DISTRIBUTION AND IDENTITY STUDIES

LITERATURE REVIEW  ...  8

MATERIALS AND METHODS  ...  41

  Study area  ...  41
  Survey and collection  ...  44
  Disease intensity, gall index and eggmass index  ...  45
  Disease incidence  ...  46
  Preliminary identification of species  ...  47
  Maintenance of root-knot nematodes under control conditions  ...  47
  Pure culturing  ...  48
  Preparation of inoculum  ...  48
  Identification of species and races of root-knot nematodes  ...  49
    a. Perineal pattern method  ...  49
    b. Differential host test  ...  49
  Frequency of species  ...  50
  Frequency of races  ...  53
  Overall assessment  ...  53
    a. Frequency of species  ...  54
    b. Frequency of races  ...  54

RESULTS
1. AGRA

  i. Incidence and intensity of the disease  ...  55
    a. Vegetable fields  ...  55
    b. Vegetable crops  ...  59
ii. Identity and frequency of root-knot nematodes in the localities
   a. Identity of the species ...
   b. Frequency of species in single and mixed populations ...
   c. Frequency of species in total infected samples ...

iii. Identity and frequency of races ...

2. ALIGARH
i. Incidence and intensity of the disease ...
   a. Vegetable fields ...
   b. Vegetable crops ...

ii. Identity and frequency of root-knot nematodes in the localities ...
   a. Identity of the species ...
   b. Frequency of species in single and mixed populations ...
   c. Frequency of species in total infected samples ...

iii. Identity and frequency of races ...

3. BAREILLY
i. Incidence and intensity of the disease ...
   a. Vegetable fields ...
   b. Vegetable crops ...

ii. Identity and frequency of root-knot nematodes in the localities ...
   a. Identity of the species ...
   b. Frequency of species in single and mixed populations ...
   c. Frequency of species in total infected samples ...

iii. Identity and frequency of races ...

4. BIJNOR
i. Incidence and intensity of the disease ...
   a. Vegetable fields ...
   b. Vegetable crops
ii. Identity and frequency of root-knot nematodes in the localities
   a. Identity of the species
   b. Frequency of species in single and mixed populations
   c. Frequency of species in total infected samples
   ... 97
iii. Identity and frequency of races
      ... 101

5. BUDAUN
   i. Incidence and intensity of the disease
      a. Vegetable fields
      b. Vegetable crops
      ... 101
   ii. Identity and frequency of root-knot nematodes in the localities
      a. Identity of the species
      b. Frequency of species in single and mixed populations
      c. Frequency of species in total infected samples
      ... 104
   iii. Identity and frequency of races
        ... 108

6. DEHRADUN
   i. Incidence and intensity of the disease
      a. Vegetable fields
      b. Vegetable crops
      ... 113
   ii. Identity and frequency of root-knot nematodes in the localities
      a. Identity of the species
      b. Frequency of species in single and mixed populations
      c. Frequency of species in total infected samples
      ... 117
   iii. Identity and frequency of races
        ... 124

7. ETAH
   i. Incidence and intensity of the disease
      a. Vegetable fields
      b. Vegetable crops
      ... 124
ii. Identity and frequency of root-knot nematodes in the localities
   a. Identity of the species ... 131
   b. Frequency of species in single and mixed populations ... 131
   c. Frequency of species in total infected samples ... 134

iii. Identity and frequency of races ... 134

8. MATHURA

i. Incidence and intensity of the disease ... 134
   a. Vegetable fields ... 134
   b. Vegetable crops ... 138

ii. Identity and frequency of root-knot nematodes in the localities ... 142
   a. Identity of the species ... 142
   b. Frequency of species in single and mixed populations ... 142
   c. Frequency of species in total infected samples ... 145

iii. Identity and frequency of races ... 145

9. MORADABAD

i. Incidence and intensity of the disease ... 145
   a. Vegetable fields ... 145
   b. Vegetable crops ... 149

ii. Identity and frequency of root-knot nematodes in the localities ... 153
   a. Identity of the species ... 153
   b. Frequency of species in single and mixed populations ... 153
   c. Frequency of species in total infected samples ... 153

iii. Identity and frequency of races ... 157

10. PAURI GARHwal

i. Incidence and intensity of the disease ... 157
   a. Vegetable fields ... 157
   b. Vegetable crops ... 160
ii. Identity and frequency of root-knot nematodes in the localities
   a. Identity of the species
   b. Frequency of species in single and mixed populations
   c. Frequency of species in total infected samples
   ... 164

iii. Identity and frequency of races
     ... 168

11. RAMPUR

   i. Incidence and intensity of the disease
      a. Vegetable fields
      b. Vegetable crops
      ... 168

   ii. Identity and frequency of root-knot nematodes in the localities
       a. Identity of the species
       b. Frequency of species in single and mixed populations
       c. Frequency of species in total infected samples
       ... 175

   iii. Identity and frequency of races
        ... 180

OVERALL ASSESSMENT

   i. Incidence and intensity of the disease in the study area
      a. Vegetable fields
      b. Vegetable crops
      ... 182

   ii. Identity and frequency of the species in different districts
       a. Identity of the species
       b. Frequency of the species in single population
       c. Frequency of the species in mixed populations
       d. Frequency of the species in total infected samples
       ... 185

   iii. Identity and frequency of the races
        ... 195

DISCUSSION

SUMMARY

vii
SECTION TWO

INTERACTION STUDIES

LITERATURE REVIEW

MATERIALS AND METHODS

I. Interspecific interactions
   a. Plant culture
   b. Inoculations
   c. Parameters

II. Intraspecific interactions
   a. Plant culture
   b. Inoculations
      i. Different inoculum levels
      ii. Split inoculum levels
   c. Parameters

III. Interactive effects of Meloidogyne javanica and
     M. incognita (Race 1, Race 2, Race 3, Race 4) on
     fecundity and morphometrics of females
     a. Plant culture
     b. Inoculations
     c. Parameters

IV. Pathotrophic ability
    a. Plant culture
    b. Inoculations
    c. Parameters

RESULTS

1. INTERSPECIFIC INTERACTIONS
   i. Interaction between M. javanica and M. incognita
      Race 1
      a. Shoot growth, root galling and eggmass
         production
      b. Population of females, total population
         and reproduction factor

   ii. Interaction between M. javanica and M. incognita
       Race 2
       a. Shoot growth, root galling and eggmass
          production
b. Population of females, total population and reproduction factor ... 257

iii. Interaction between *M. javanica* and *M. incognita* Race 3 ... 259
   a. Shoot growth, root galling and eggmass production ... 259
   b. Population of females, total population and reproduction factor ... 261

iv. Interaction between *M. javanica* and *M. incognita* Race 4 ... 261
   a. Shoot growth, root galling and eggmass production ... 261
   b. Population of females, total population and reproduction factor ... 263

2. INTRASPECIFIC INTERACTIONS OF *MELOIDOGYNE JAVANICA* AND *MELOIDOGYNE INCognITA* ... 266

i. Intraspecific interaction at different inoculum levels ... 266
   1. *M. javanica* ... 266
   2. *M. incognita* Race 1 ... 268
   3. *M. incognita* Race 2 ... 271
   4. *M. incognita* Race 3 ... 273
   5. *M. incognita* Race 4 ... 276

ii. Intraspecific interactions in split and non-split inoculations ... 280
   1. *M. javanica* ... 280
   2. *M. incognita* Race 1 ... 283
   3. *M. incognita* Race 2 ... 286
   4. *M. incognita* Race 3 ... 286
   5. *M. incognita* Race 4 ... 289

3. INTERACTIVE EFFECTS OF *MELOIDOGYNE JAVANICA* AND *M. INCognITA* ON THEIR FECUNDITY AND MORPHOMETRICS ... 294
   a. Fecundity ... 294
   b. Morphometrics ... 296

4. PATHOTROPHIC ABILITY ... 298
   A. TOMATO ... 298
   a. Shoot growth, root galling and eggmass production ... 298
   b. Population of females, total population and reproduction factor ... 300
c. Fecundity ... 301

d. Morphometrics ... 303

B. EGGPLANT ... 305

a. Shoot growth, root galling and eggmass production ... 305

b. Population of females, total population and reproduction factor ... 305

c. Fecundity ... 307

d. Morphometrics ... 309
