ACKNOWLEDGEMENTS

By the grace of Almighty God and blessings of my respected parents, Mr. G.S. Pandey and Mrs. Rajwati Pandey, the exhaustive analysis of proteins of a very large area could be compiled in the form of this thesis.

First of all, I would like to thank, by the core of my heart, to my revered teacher and supervisor, Dr. Absar-ul Hasnain, without whose meticulous and talented guidance, deep knowledge and continuous encouragement, this work will never find its present shape. Words fall short to describe him not only as research guide but a patron that gave direction to my life for which just to say thanks is not enough.

I am highly indebted to Prof. Jamil A. Khan, Prof. A. K. Jafri (Former and the present Chairpersons, Department of Zoology) for providing necessary facilities in the department and Prof. (Mrs.) D. S. Jairajpuri for generous use of Parasitology Research Lab facilities.

I sincerely accord my gratitude to Prof. Asif A. Khan, Dr. Iqbal Perwez and Dr. Abbas Abidi for their time to time help.

I would fail in my duty if I do not acknowledge the material help provided by Prof. Tariq M. Haqqi (Case Western Reserve University, Cleveland, USA) and fruitful discussions during his visits to this lab. The software analysis would remain a mirage without the assistance of Ali Hasnain Baqri of Inductis Inc. (USA).

I also put on record and acknowledge the cooperation, encouragement and working ambience provided and shown towards me by my lab colleagues, (Dr.) Nikhat Nabi, Syed Hasan Arif and Mumtaz Jabeen. I will always recall the outstanding contribution of Riaz Ahmad in giving the statistical data the present format.

I also cannot forget the sacrifices of my wife Seema and daughter Shivanshika, who tolerated my absence with remarkable patience. These moments now really have become past, but their spiritual love and moral support helped me a lot during the course of the study.

I also extend my thanks to Mr. Zaheer Ahmad and Shakir Ali specifically for helping in fish procurement.

Finally, the financial assistance provided by Indian Council of Agriculture Research (ICAR), New Delhi in carrying out most of the work is thankfully acknowledged.

(Rakesh B. Pandey)
