It gives me immense pleasure to express my heartfelt gratitude to all those who have been there with throughout my research period, lending their helps in every possible way.

I am deeply indebted to Prof. Dr. I.S. Bright Singh for his brilliant and inspiring guidance all the way through my doctoral research. He has guided me through the sunshine and darkness of my research with patience and tremendous support. He always set the bar high and was never willing to compromise. I greatly cherish with gratitude, those academic tours I was able to accompany him, for those experiences enabled me to carve out a better scientific attitude towards life. His steady energy, high-quality work and dedication has always been my inspiration in research and I consider the years that I worked with him a valuable learning experience that will continue to inspire my academic career and life. Thank you sir, for those gems of virtues you contain and shower, they forever motivate me to imagine scientifically and work hard to reach my dreams.

The relentless support by Dr. Rosamma Philip, my Co-guide was always there behind the successful completion of this cherished ambition. Her innate friendliness and practical wisdom has always influenced me. Teacher, I am very much thankful to you for all the guidance and care you have given me.

I thankfully acknowledge Dr. K. Mohankumar, Dean, Faculty of Marine Science for all the support in smooth conduct of my research.

I sincerely place on record my thanks to Dr. A.V. Saramma, Head Department of Marine Biology, Microbiology and Biochemistry for facilitating my research under the Department and for all support she has rendered me.

My deep gratitude to Prof. Dr. Mohandas, for being a pillar of strength, and a wonderful friend whose amazing ways prove teachers can be great friends too. Thank you very much Sir for all those valuable advices, fatherly affection, all those nice gifts, and all jokes and funny SMSs shared.

Words are not enough to express my thankfulness to my dear chechi, Dr. Valsamma Joseph for her motherly fondness, moral values and care which helped me to triumph over all thick and thin of research life. My thesis would never have materialized in time, if I were not endowed with her constant encouragement and intellectual contributions. Chechi, I am extremely beholden to you evermore, for all the care, compassion and support I enjoy.

I take this opportunity to thank all my teachers in the past and present, Dr. R. Damodharan, Dr. N.R. Menon, Dr. Kuttiyamma, Dr. Mohammed Sahli, Dr. C. K. Radhakrishnan, Dr. Babu Philip, Dr. Mohammad Haatha for the way they have moulded my life. A special thanks to Dr. Nandini.

The statistical analysis of the wealth of data generated would not have been possible, but for the ready help and brilliant involvement of Mr. H.K. Krishna Iyer, Retd. Scientist (CIFT). Sir, I am thankful to you all the helps you have rendered and the fatherly affection showered.

There are so many people who shared their scientific wisdom and practical experience with me in solving the difficulties experienced at various stages of this investigation. It is a great pleasure to place on record my gratitude to them.
Dr. J.G. Kuenen, Emeritus Professor, and Mr. Udo Van Dongen, Environmental Biotechnology group, TU Delft, The Netherlands for their immense support and valuable suggestions regarding the characterization of the consortia especially with Fluorescence in situ hybridization.

I sincerely thank to Dr. Yogesh Shouche and his students Mr. Shashikant Sharma, Mr. Chandresh Thakur, Molecular Biology unit of NCCS, Pune for training me in recent techniques of molecular biology. Visit to their lab greatly inspired the molecular biologist within me.

Dr. Rob Reed, University of Queensland, is greatly acknowledged for his efforts in the fast and effective editorial corrections of the manuscripts.

Without the cooperation of Hatchery personnels, it was impossible to think about the validation of bioreactors. I thankfully acknowledge the staff of M/s Rosen Fisheries, Thrissur, Matsyfed hatchery, Kollam, Ponnani and West Coast Hatchery, Andhakaranazhy in this regard.

I am thankful to Mr. Mohan Kandaswamy, M/s Oriental Aquamarine Pvt.Ltd. for the helps rendered to me during the commercialization of the bioreactor technology and for technical suggestions.

The administrative staff of the Department of Marine Biology, Microbiology and biochemistry, is wholeheartedly thanked for their support.

This thesis is an outcome results of two research projects funded by the Department of Biotechnology (DBT) (Project code: BT/PR/1794/AAQ/03/092/99) and Department of Science and Technology (Project code:SR/SO/AS-15/2003). I acknowledge the financial support from DBT and DST in the form of Junior and Senior Research Fellowships.

Many of the eminent scientists working in the area of nitrification have promptly helped with replies to my research queries. I sincerely thank them.

The field validation of the bioreactors was so smooth, because of the co-operation and support of the team members in the project. I thank Dr. Cini Achuthan for her valuable guidance and support in the initial days of my research carrier. My colleague, Ms. Manju N.J, was of immense help to me as a team member and I sincerely thank her.

The lab was a home to me and I wish to place on record my high appreciation beyond words to all my good friends for having nurtured a congenial and loving environment around me. It would never have been the same to me if I was not having Ms. Seena Jose as my best friend, to give me a nice and faithful company, which spanned from individual to scholarly support and camaraderie. Thank you Seena, for all the good hearted gestures. I would like to say a big ‘thank-you’ to my friend Vrinda Sukumaran who helped a lot to prevail over the last phases of molecular biology work so that I could finish it promptly at the pace of a swift. My friend Priyaja, who has always been a source of pragmatic vision, helped me constantly with her sensible suggestions when ever I was at stake. I thank her wholeheartedly for all those ‘beyond price’ ideas.

I express my appreciation to Sreedharan for being a good classmate, a nice friend and a warm associate through out the long spanned years. I applaud him for all the changes he had, from the loner he was, to the strong, brave and practical man he is!! It would be a matter of immense content, if my role was conducive in helping him to bring such a brilliant transformation. Thank you Sreedharan for all the helps and back-ups. Selvan, I am so much grateful to you for all the colours and fragrance of days we spent in concert for the last scores of years in hostel and campus, enjoying life, playing Table tennis, cracking jokes and wandering around. Ms, Anupama, my friend
and classmate, always remembered for her great writing skill, helped me a lot when ever a situation arose. I am really lucky to have a friend like her.

Dr. Somnath Pai has always rendered me relentless support as a big brother, both personally and scientifically. I value those 'molecular discussions' and clarifications as they contributed greatly in successfully completing my work. Pai, 'a big thanks' to you.

I treasure the greater and lighter moments that I shared with each one at NCAAH family. The co-operations obtained from Ms. Gigi Paulose and Mr. Sudheer really helped in solving many Bio-assay complications. It is very nice to recollect the Gym-days with Ranjith, his health consciousness some times made me to think about my own health. My friend Haseeb, the chemical man, is always dependable and I cherish him. I thank Mr. Cums, Charles, for the love and concern and the valuable help I received during the 'submission days'. Sunish chettan, Deepesh, Sreelakshmi, Surekha, Rosemary, Sunitha, Divya (AKTA), Riya (AKTA), Ammu (youth wing), Jayesh, Prem, Vijay, Manjusha, Swapna Antony, Laiby and Archana, I always treasure your friendships and helps rendered me from time to time. Special thanks to Aneesh, Blessy, Surya, Jaison, Biju, Savin, Praveen, Madulal, Shibu and Kusumam Chechi for their timely help and assistance given to me during the research period.

I sincerely thank Soman chettan for all the support he provided me from time to time.

I would like to thank my senior colleagues and friends Ranjith, Sunil, Manjusha, Meera, Maya, Sincy, Sajeewan, Anitha Thankachan, Jayaprakash, Anaz, Preetha, Shibu K Mani, who were highly supportive and helpful during the early part of the work and have since moved on in life, but the period spent in your company was memorable to say the least.

I must say that my research tenure has become more lively and enjoyable due to the lighter and loving moments at CUMS Hostel and I specially thank my room mates Harishankar, Nousherkhan and friends Sunish Thampy, Neel, Promotten, Abilash, Jaleel and Padmakumar and many more whom I many not have mentioned now, for making my research tenure so memorable.

I specially thank my MSc. classmates Santhosh, Hareesh, Anu anto, Ajila, Roja and Usha. I always cherish those days. I thank all the Research Scholars and Msc. Students of the Department of Marine Biology for all the support given.

I would like to share this moment of happiness with my family- my grant mother, father, mother, brother and sister-in-law, sister and brother-in law and my little ones at home- Abhay, Aarav, Adithya and Krishna. They render me always enormous support in all ventures of life and with their patience and understanding they stood with me all throughout. They gave the encouragement and motivation for the successful completion of my research work; I take this opportunity to dedicate this work to them.

I might have missed some names, but my innermost thanks to them and all those who have helped me in one way or other in the accomplishment of this mission.

With prayers, I offer thanks to the greatest force for assigning me this work, and helping me through out for its successful completion.

Rejish Kumar V.J.
