ACKNOWLEDGEMENTS

I wish to express deep sense of gratitude to my supervisor Dr. W.A. Nizami for his diversified guidance, encouragement and exuberant style of inspiration throughout the course of this study. In fact it was a great privilege to work under his guidance.

Sincere thanks are due to the Chairman, Department of Zoology, A.M.U., Aligarh for providing the necessary laboratory facilities.

I am also particularly indebted to Prof. A.H. Siddiqi, Dean, Faculty of Life Science, for critically going through the manuscript.

My appreciation is also extended to Dr. M. Fahim, Prof. T.A.V. Subramaniam and Dr. Vijay Kumar of Patel Chest Institute, Delhi for extending all the necessary help and facilities for scintillation counting.

Thanks are also due to Mr. Q.M. Ali, Department of Statistics, A.M.U., Aligarh for his advice on aspects of statistical analysis.

My warmest thanks to Dr. R.E.B. Hanna, Ex-Senior Lecturer, Queen's University, Belfast, for his enlightening discussions during his visits to A.M.U., and also for sending chemicals and literature etc. freely whenever requested. Special thanks to Dr. R.G. Mattison, visiting Post Graduate Student from Q.U.B., Belfast, for providing assistance in immunological studies.

Technical guidance in electron microscopy as provided by Mr. G. Brennan, Chief Electron Microscopist, visiting fellow from Q.U.B., Belfast, is gratefully acknowledged.
To my colleagues Dr. Mohd. Ahmad, Ms. Parveen Khan, Mr. Malik Irshadullah, Mr. Afsar Ali and Mr. Khalid Saifullah, I am thankful for their generosity with which they have provided assistance to accomplish this work and they have truly shared in its gestation which was much longer than expected.

I am grateful to Mr. A. Samdani for typing the manuscript.

Finally, I gratefully acknowledge the I.C.A.R. and C.S.I.R., New Delhi for providing the financial assistance.
