ACKNOWLEDGEMENT

It is with a deep sense of gratitude that I express my sincere thanks to my supervisor Prof. Noor Mohammad, Chairman, Department of Sociology for his valuable guidance, timely suggestions and constructive criticism. He had been a constant source of encouragement to me at every stage of my work and career for which I will ever remain indebted. It is only because of his inspiration and generous help that I have been able to complete this work.

I will be failing in my duty if I do not thank Dr. Asif Z. Khan and Dr. Neelam Bharadwaj of Community Medicine, who helped me at the initial stage of this study in preparing the proforma. Further, Dr. A.Z. Khan was very kind in revising the manuscript and making valuable suggestions. I am very thankful to him.

I would like to bring on record my appreciation and thanks to all the teaching and administrative staff of the Department of Sociology for their help and encouraging attitude.

I am thankful to the staff members of the Department of Community Medicine and Paediatrics for their help and cooperation during the study.

I am also thankful to Dr. S. Gauhar Rizvi, Lecturer in the Department of Statistics for his help in statistical analysis of the data.
I am equally grateful to Mr. Alcom Khan of the Department of Surgery for making excellent diagrams.

My special thanks to my children, Irmeen and Yasser, who were extremely helping and co-operative during the course of this study.

I would also like to thank Prof. Abu Qamar, my husband, for the exuberant concern and keenness which he expressed from time to time and was instrumental in getting this project completed.

Finally, a word of appreciation to the nameless patients and mothers who became the basis of this study and co-operated with me gently while collecting the informations.

SOFIA TARANNUM
