ACKNOWLEDGEMENTS

This study could not have seen the light of day without the invaluable supervision of my guide and teacher, Prof. (Mrs.) Hamida Ahmad, Department of Psychology, AMU, Aligarh. Words cannot express the extent to which I am grateful to her. I express my sincerest gratitude to her for helping me out in this crucial work despite her busy schedule at the department and other counters.

I am also very thankful to Prof. Shamim Ansari, Chairman, Department of Psychology, AMU, Aligarh for his support and encouragement.

I would also like to acknowledge the help given to me by Prof. Qamar Hassan, Department of Psychology, AMU, Aligarh. His guidance in designing the two tools of study was immense and it was because of him that this particular aspect of work was done well.

I owe thanks to Prof. Akbar Husain for his kind help at various junctures. I am grateful also to Dr. Naheed Nizami, Dr. Naima Gulrez and Dr. Tabussum Rashid for their constructive suggestions.

I am also grateful to my brother Mr. Ahmar Khan Assistant Professor, FORE School of Management, New Delhi, for helping me in getting the “Anxiety Sensitivity” scale, which was crucial for the completion of the present endeavour.
My special thanks go to my husband Mr. Asif Ali Syed, Lecturer, Dept. of Business Administration, AMU, Aligarh for accepting all my sins of omission at home while I was busy in my work. He contributed immensely to data analysis.

At the same time the moral support extended to me by my parents, brothers, cannot go without mention, since one needs it when long study hours take their toll.

I wish to express my gratitude to all my relatives who have been a source of emotional support at times when needed.

I end this series of acknowledgement by thanking Almighty for everything.
