## CONTENTS

### CHAPTER I INTRODUCTION

1.0 Brief Survey of the Cosmic rays. 1

1.1 The Sun.

   1.1.1 The Sunspots. 8

   1.1.2 solar Flare. 17

1.2 Heliosphere and Current Sheet. 20

1.3 Solar Wind. 27

1.4 Interplanetary Magnetic Field. 35

1.5 A Model for Solar Field Reversal. 43

1.6 Solar Modulation of Galactic Cosmic Rays. 46

1.7 Isotropic (time dependent) Variations. 50

   1.7.1 11-year variation. 50

   1.7.2 22-year Variation. 56

   1.7.3 Forbush Decreases. 57

1.8 Anisotropic (Spatial) Variation. 63

   1.8.1 Diurnal Variation. 64

1.9 Modulation Processes. 67

### REFERENCES

### CHAPTER II METHODS FOR ANALYSING THE COSMIC RAY DATA

2.0 Introduction. 86

2.1 Trend-Correction. 88
2.2 Harmonic Analysis.

2.2.1 Application of Harmonic Analysis to Cosmic Rays.

2.2.2 Twenty - Four Ordinate Scheme.

2.2.3 Amplitude and Phase of Harmonic Component.

2.3 Computer Programme.

CHAPTER III LONG TERM VARIATION IN COSMIC RAY ISOTROPIC AND ANISOTROPIC COMPONENT OF COSMIC RAY INTENSITY.

3.0 Introduction.

3.1 Isotropic Variation.

3.1.1 Average time profile of the long-term variation.

3.1.2 Correlation between the Cosmic Ray Intensity Variations and Sunspot Activity.

3.1.3 Long-Term Variation of Cosmic Ray Intensity and Geomagnetic Indices.

3.1.4 Hysteresis Curves and 22-Year Variation in Cosmic Ray Intensity.

3.1.5 Long-Term Variation of C.R.intensity and Forbush Decreases.

3.2 Anisotropic Variations.

3.2.1 The Characteristic features of the diurnal anisotropy during solar activity cycles 20 and 21.

3.2.2 The nature of the diurnal anisotropy during the different phases of solar activity cycles 20 and 21.

3.3 Dependence of amplitude and phase of diurnal anisotropy on solar magnetic field polarity (drift model).

3.4 Discussion.
CHAPTER IV  EFFECTS OF SOLAR WIND STREAMS ON INTENSITY VARIATIONS OF COSMIC RAYS.

4.0 Introduction.

4.1 High speed solar wind streams (Data Analysis).
   4.1.1 Result and Discussion.

4.2 Cosmic Ray and Geomagnetic Efficiency of Interplanetary Plasma.
   4.2.1 Results and Discussion.
   4.2.2 Variation of Cosmic ray Intensity and Solar Activity (Sunspot No) inside and outside the RHSSs at 1 AU.

4.3 Conclusion.
