ACKNOWLEDGEMENT .....	i
PREFACE .....	ii
CONTENTS .....	iv
LIST OF FIGURES .....	vii
LIST OF TABLES .....	ix
<b>CHAPTER I:     <u>INTRODUCTION</u></b>	
1.1. Importance of the study of nuclear disintegration.....	1
1.2. Importance of the study on the emission of fast tritons and He-nuclei .....	2
1.3. Process of nuclear disintegration	5
1.4. Present knowledge and the scope of work on the emission of tritons and He-nuclei .....	8
<b>CHAPTER II:    <u>EXPERIMENTAL TECHNIQUE</u></b>	18
2.1.1. Introduction.....	18
2.1.2. Details of the stack .....	18
2.1.3. Scanning method .....	19
2.1.4. Classification of stars .....	19
2.1.5. Separation of secondary tracks	20
2.1.6. Selection criteria .....	22
2.2.1. Method of Measurements .....	23
2.2.2. Range .....	25
2.2.3. Energy loss of charged particles by collisions with electrons	28
2.2.4. Range-energy relation .....	31
2.3.1. Scattering .....	34
2.3.2. Errors and their corrections	38
2.3.3. Distortion and its corrections	39
2.3.4. Constant sagitta method .....	41
2.3.5. Noise elimination .....	44

	Page
2.4.1. Ionization .....	47
2.4.2. Measurement of ionization .....	50
2.4.3. Delta-rays .....	51
2.5. Identification of the particles ...	55
<b>CHAPTER III: <u>EMISSION OF FAST PROTONS IN THE INTERACTION OF 24 GeV/c PROTONS WITH HEAVY NUCLEI OF EMULSION</u></b> .....	61
3.1.1. Introduction .....	61
3.2.1. Transverse momentum distribution of protons .....	64
3.2.2. Momentum distribution of protons ..	67
3.2.3. Energy spectrum of protons .....	68
3.2.4. Angular distribution of protons ...	69
3.3. Mechanism of emission ...	69
3.3.1. Introduction .....	69
3.3.2. Evaporation process .....	70
3.3.3. Energy spectra of evaporated particles .....	72
3.4.1. Mechanism of nucleon-nucleus interactions .....	75
<b>CHAPTER IV: <u>EMISSION OF FAST HE-NUCLEI AND TRITONS IN THE INTERACTIONS OF 24 GeV/c PROTONS WITH HEAVY NUCLEI OF EMULSION</u></b> .....	83
4.1.1. Introduction .....	83
4.1.2. Identification of isotopes amongst doubly charged particles .....	83
4.1.3. Isotopic abundance of the secondary He-nuclei .....	88
4.2.1. Energy spectrum of secondary He <sup>3</sup> -nuclei .....	90
4.2.2. Transverse momentum distribution of He <sup>3</sup> -nuclei .....	94
4.2.3. Angular distribution of He <sup>3</sup> -nuclei	95
4.2.4. Frequency of emission of He-nuclei	95
4.2.5. Track pair occurrence ...	97
4.2.6. Star size distribution...	98
4.3. Theoretical models .....	100
4.3.1. Evaporation .....	100
4.3.2. Direct processes .....	101

	Page
4.3.3(1). Interaction of cascade nucleons with substructures in nuclei.....	103
4.3.3(11). Pick-up process .....	108
4.4. Absorption of $\pi$ -mesons in nuclear $\alpha$ -clusters .....	118
4.4.1. Introduction .....	118
4.4.2(a). Interaction of $\pi^-$ -mesons with $He^4$ .....	120
4.4.2(b). Interaction of $\pi^+$ -mesons with $He^4$ .....	121
4.4.2(c). $\pi^0$ -meson interactions with $He^4$ ..	122
4.4.3. Calculation of the absorption probability of pions .....	123
4.5. Emission of fast tritons.. .....	132
4.5.1. Introduction .....	132
4.5.2. Energy spectrum of tritons .....	132
4.5.3. Transverse momentum distribution of tritons .....	135
4.5.4. Angular distribution .....	135
4.5.5. Frequency of emission.....	135
4.5.6. Star size distribution....	136
 CHAPTER V: <u>SUMMARY AND FINAL REMARKS</u> .....	 141
