## Chapter I: Preliminaries

1.1 Introduction                              | 1    |
1.2 Fixed Point Property                      | 2    |
1.3 Banach Contraction Principle              | 3    |
1.4 Jungck’s Theorem                          | 6    |
1.5 Weak Commutativity                        | 7    |
1.6 Certain Banach Spaces                     | 8    |
1.7 Non-Expansive Mappings in Banach Spaces   | 9    |
1.8 L-Spaces                                  | 11   |
1.9 2-Banach Spaces                           | 12   |

## Chapter II: Fixed Points of Generalized Contractions in Metric and Uniform Spaces

2.1 Introduction                              | 14   |
2.2 Results in Metric Spaces                  | 15   |
2.3 Results in Uniform Spaces                 | 24   |

## Chapter III: Fixed Point Theorems for a Class of Mappings

3.1 Introduction                              | 31   |
3.2 Self-Mappings on a Complete Metric Space  | 31   |
3.3 Illustrative Examples                     | 39   |
3.4 Self-Mappings on Separated L-Spaces       | 43   |
### 3.3 Convergence of Sequences and Their Fixed Points

#### 3.6 Common Fixed Points in Uniformly Convex Banach Spaces

## Chapter IV: Fixed and Coincidence Points in Banach and 2-Banach Spaces

4.1 Introduction

4.2 Fixed Points of Certain Involutions

4.3 Some Related Examples

4.4 Results in 2-Banach Spaces

4.5 Approximation of Fixed Points

## Chapter V: Set-Valued Maps with Unique Fixed Points

5.1 Introduction

5.2 Preliminaries and Notations

5.3 Extension of Daner's Theorem and an Example

5.4 A Common Fixed Point Theorem

## Chapter VI: Two Examples in Fixed Point Theory

6.1 Introduction

6.2 Sequences of Mappings and Fixed Points

6.3 An Extension of Delbosco's Fixed Point Theorem

## Bibliography

## Appendix
