ACKNOWLEDGEMENT

I wish to express my gratitude to my supervisor, Dr. Mobin Ahmad Khan for his encouragement, constructive comments and valuable guidance in completing this thesis. He painstakingly read the whole work with absolute dedication and suggested corrections most sincerely.

I will be failing in my duty if I do not express my most sincere thanks to Prof. Abdul Azim under whose able supervision I was originally registered as a research scholar and under whose expert guidance I wrote my M.Phil. dissertation. The amount of work he did for this thesis is enormous. His encouragement, his passion for perfection, his diligence, his affection and his total command over the subject was simply out of this world. He continued to encourage me to pursue and complete the work after the change of my supervisor when he retired from the University service. I will always be short of words to express the respect and affection I have for him.

I would like to express my thanks to Prof. Iqtidar Hussain Khan for his sincere help and readily available guidance which he extended to me during the writing of this thesis. Though he was not my supervisor, he always came forward to help me out whenever need arose. He was a constant source of encouragement and inspiration to me. In fact, I feel lucky to have so many senior teachers to take care of the problems I faced during the course of this work.

I have no words to thank Dr. Intiaz Hasnain who came forward to help me whenever I needed somebody to solve day to day problems in writing the thesis. He not only coaxed me to complete it but also took keen personal interest to correct mistakes and suggested improvements. My gratitude is also due to his wife, Ms Shagufta Intiaz for the encouragement she gave me.

My thanks are also due to Dr. A. R. Fatih for his help and encouragement. I must also thank my friends and colleagues namely, Ms. Shazi Najm, Ms. Zia Rauf, Mr. S. Ikhteyar Ali and Mr. Rehan Ahmad, who helped me tide over the hurdles I had to cross during the last three years.

I find it most pleasurable to thank Prof. William Diver, who gave some very valuable suggestions during his short visit for an International Seminar here at Aligarh.

I am also indebted to Dr. Kavita Rastogi and Mr. Feroz Khan who contributed their bit by introducing me to many artisans in Lucknow.

I also thank Mr. Najeebul Hasan Khan, of the Seminar Library and the office staff of the Linguistics department for their kind help.

I must admit that this thesis would not have seen the light of the day without the strong encouragement from my family members who extended to me their fullest cooperation to let me work on the thesis will full concentration. I will always remember the encouragement I received from my parents and my brother-in-law, Prof. M. Ilyas, A.B.U. Zaria, who kept on infusing courage in me to complete the work.

The thesis has been prepared with the help, guidance, and supervision of many senior professors in the field but all the mistakes and errors are mine and mine alone.

In the end I must also thank Mr. Mohd Riaz Khan for typing out the thesis neatly and with sincerity.

(Ms. SHABANA HAMEED)
