**LIST OF DIAGRAMS AND TABLES**

**Introduction**

Diagram 0-1: Scale of adroitness for the Tongue Parts .................................................. 24
Diagram I-1: Phonological Grid of Delhi Urdu ................................................................. 45
Table 1-1: Repetition of Voice ............................................................................................. 59
Table 1-2: Repetition of Unaspirated and Aspirated Stops in the Initial and Final Position of the Word .............................................................. 60
Table 1-3: CVC versus CCVC and CVCC Words ................................................................. 63
Diagram I-2: Hierarchy of the Adroitness of Articulators and the Make-up of Consonants ............................................................................................................. 67
Table 1-4: Frequency of occurrences of Consonantal Units in the Monosyllabic Words in Terms of Articulators ........................................................... 70
Table 1-5: Frequency of occurrence of Stops in the Monosyllabic Words in Terms of Articulators ......................................................................................... 75
Table 1-6: Frequency of occurrences of Fricatives in the Monosyllabic Words in Terms of Articulators .................................................................................... 79
Table 1-7: Frequency of occurrences of Liquids in the Monosyllabic Words in Terms of Articulators ......................................................................................... 83
Table 1-8: Frequency of occurrences of Nasals in the Monosyllabic Words in Terms of Articulators ......................................................................................... 86

**CHAPTER II**

Table II-1: Frequency of Voiceless and Voiced Consonants in Monosyllabic Words .......................................................... 102
Table II-2: Voicing and Voicelessness in C₂ of the CVC₁ C₂ Words .............................. 105
Table II-3: Frequency of Voiceless and Voiced Stops in Monosyllabic Words .............. 108
Table II-4: Voking and Voicelessness of the Stops in $C_2$ of the CVC $C_2$ Words ................................................................. 110
Table II-5: Frequency of Voiceless and Voiced Fricatives in Monosyllabic Words ............................................................... 112
Table II-6: Frequency of Unaspirated and Aspirated Stops in Monosyllabic Words ................................................................. 119
Table II-7: Frequency of Oral and Nasal Vowels in Monosyllabic Words ................................................................. 125
Table II-8: Frequency of Oral and Nasal Vowels in CVCC Words ............ 127
Table II-9: Frequency of Apico-dental Consonants and Apico-palatal Consonants in Monosyllabic Words ........................................ 133
Table II-10: Potential and Actual Number of Words in Delhi Urdu ............. 144

CHAPTER III:

Diagram III-1: The Phonemic Inventory of Delhi Urdu ............................. 161
Diagram III-2: Vocalic Phonological Units of Classical Urdu .................. 177
Diagram III-3: Vocalic Phonological Unit of Delhi Urdu .......................... 178
Table III-1: Vowel Source for Delhi Urdu $e$, $e$, $o$, $o$: ......................... 188
Table III-2: The Frequencies of usage for the CVC CVCC and CCVC Words ........................................................................ 211
Table III-3: Frequency of Consonantal Units in the Initial and Final Position of the CVC Words in Terms of Articulators ................ 216
Table III-4: Frequency of Stops in the Initial and Final Position of the CVC Words in Terms of Articulators ................................. 218
Table III-5: Frequency of Fricatives in the Initial and Final Position of the CVC Words in Terms of Articulators .............................. 222
Table III-6 : Frequency of Liquids in the Initial and Final Position of the CVC Words in Terms of Articulators ........................................224
Table III-7 : Frequency of Nasals in the Initial and Final Position of the CVC Words in Terms of Articulators ........................................226
Table III-8 : Frequency of the Unaspirated and the Aspirated Stops in the Initial and Final Position of the CVC Words .................229
Table III-9 : Frequency of the Consonantal Units in the Initial and the Final Position of the CVC Words .................................................................231
Table III-10 : Frequency of the Stops in the Initial and Final Position of the CVC Words ................................................................................................................233
Table III-11 : Frequency of the Fricatives in the Initial and Final Position of the CVC Words ........................................................................................................235

CHAPTER IV :

Diagram IV-1 : Articulatory Features of Delhi Urdu Vowels ...........................................262
Table IV-1 : Minimum Formant Frequency of Short Vowels ..............................................267
Table IV-2 : Maximum Formant Frequency of Short Vowels ..............................................267
Table IV-3 : Average Formant Frequencies of Short Vowels .............................................267
Graph IV-1 : Graphic Representation of F₁ and F₂ of Short Vowels .........................268
Table IV-4 : Minimum Formant Frequencies of Long Vowels ........................................269
Table IV-5 : Maximum Formant Frequencies of Long Vowels .......................................269
Table IV-6 : Average Formant Frequencies of Long Vowels .........................................270
Graph IV-2 : Graphic Representation of F₁ and F₂ of Long Vowels .........................271

CHAPTER V :

Table V-1 : Labial versus Non-Labial Stops in the Word Initial and Final Position in CVC Words .................................................................276
Table V-2: Labial versus Non-Labial Fricatives in the Word Initial and Final Position of the Words ........................................ 277

Table V-3: Labial versus Non-Labial Nasals in the Word Initial and Final Positions in CVC Words ........................................ 279
