5. Use of various objects in Daily Life & their Technology 97-215

Iron Objects: (A) Weapons used for warfare and hunting, (B) Household objects (C) Craft tools (D) Objects use in Agricultural Operations 97-107

Iron Technology: Result from chemical and spectrographic analysis of Rajghat and Atranjikhera 108-123

Copper Objects: (A) Ornamental Objects, (B) Toiletries Objects (C) Craft tools (D) Household Objects (E) Miscellaneous Objects 124-129

Copper Metallurgy: Mining, Mines, Smelting, Emerging picture of copper metallurgy from Atranjikhera and Rajghat 130-142

Silver punch-marked coins: Composition of metals, technique, prices 143-161

Bone and Ivory Objects 162-174
Bone: Arrow-heads, Bone points
Ivory: ivory figure, arrow-heads and points, comb
The tools and technique

Stone Objects: querns, (A) legged querns (B) saddle querns, muller, mortar, pestle.
Tools and techniques 172-181

Terracotta: Animal figurines, bull, elephant, horse, naga, ram, deer and stag, bird, human figurines, colour, technique, terracotta disc & other objects of terracotta 182-201

Pots and Pans: Black and Red Ware (BRW), Black Slipped Ware, The Grey Ware and the Red Ware, Northern Black Polished Ware (NBPW) 202-215
Classification of potteries: Cooking vessels, eating vessels, drinking vessels or vessels for storing water, pots for storage purposes and industrial utensils.

6 Conclusion 216-230

Appendix of some important excavated sites of northern India. c. 600 BC – 320 BC 231-236

Bibliography 237-266
Figure:
Ancient copper-making furnace at Ambaji, Rajasthan.

Maps:
1. India in the age of Mahajanapadas
2. Rajasthan Plain
3. Punjab Plain
4. Upper Ganga Plain
5. Middle Ganga Plain
6. Bundelkhand Region
7. Malwa Region
8. Udaipur-Gwalior Region

Tables:
1. Site wise distribution of the grains between c. 600 – 320 B.C.
2. Varying size of bricks at important sites during the period under research
3. Distribution of various iron objects from some important archaeological sites of northern India between c. 600 – 320 B.C.
4. Number of iron objects from some important sites between c. 600 – 320 B.C.
5. Tabular representation of iron objects of four kinds viz., war and hunting, craft tools, household objects and objects of agriculture in percentage
6. Percentage composition of iron ores from different areas, which were exploited by the people during period under study
7. Chemical and spectrographic analysis of iron objects of Atranjikhera
8. Percentage composition and impurity pattern of iron objects from Rajghat based on spectrographic analysis
9. Distribution of various copper objects between c. 600 – 320 B.C.
10. Percentage composition of copper objects from the late PGW and Early NBPW (pre and post c. 600 B.C.)
11. Local series of punchmarked coins; their shape, symbols and weight issued by different Janapadas (states)
12. Weight diameter and thickness of terracotta discs reported at Atranjikhera
Plates:

I. Clay plaster showing depressions caused by reeds at Atranjikhera
II. A mud floor with domestic hearth, drain and post-holes at Atranjikhera
IIIA. Furnace for the forging of iron objects at Ujjain.
IIIB. Wooden reinforcement to mud fortification at Ujjain.
V. A furnace with a pair of tongs in the foreground at Atranjikhera.
VI. Punchmarked coins (local and imperial type)
VII. Terracotta discs at Atranjikhera.
VIII. A granary with lumps of charred grains at Atranjikhera.
