ACKNOWLEDGEMENTS

The present thesis is the outcome of several years of study of the various aspects of mafic rocks of north Delhi fold belt, particularly its geochemical parameters. During the course of the present study I have received a great amount of help from various organizations and individuals, whom I wish to acknowledge and thank from the depth of my heart.

It gives me immense pleasure in placing on record my greatest sense of gratitude to the man of wisdom, my revered supervisor, Dr. Mahshar Raza for his scrupulous guidance and scholarly encouragement. Since the dawn of this research work, he extended his sagacious and sapient advices. His quixotic help and assiduous interest always save me from falling into abyss of despair. Throughout the course of this research work he acted as a catalyst whenever the pace of the work suffered retardation. I do not have words to extoll his intelligence rather to call him a paragon.

I am also gratefully beholden to Prof. Iqballuddin, Chairman, Department of Geology, who made available unhesitatingly all facilities of labs and seminar library of the department required during the present work.

The kind permission of the Directors of the National Geophysical Research Institute (NGRI), Hyderabad
and Wadia Institute of Himalayan Geology (WIHG), Dehradun for the chemical analyses of the rock samples of this study is gratefully acknowledged. Dr. S.M. Naqvi, Dr. S.H. Jafri (Scientists of NGRI), Dr. M.I. Bhat, Dr. T. Ahmad, Dr. M.S. Rathi, and Dr. N.K. Saini (Scientists WIHG) deserve special mention for their valuable help rendered during the course of analytical work at the respective labs.

I also wish to thank Dr. C.D.P. Singh and Dr. R. Bhardwaj of the Khetri Copper Project for their help during the course of field excursions and sample collection. I also wish to put on record my appreciation for the people of Ballabgarh village of Bayana area, distt. Bharatpur for their hospitality and for providing accommodation and other facilities during my stay there.

I am greatly indebted to my teachers viz. Prof. Khurshed Akhtar, Dr. Shahid Farooq and Dr. A.H.M. Ahmad and my colleagues viz. Dr. S.H. Alvi, Dr. M. Shamim Khan and Dr. Z.S.H. Abu-Hamatteh for their critical appraisal and valuable suggestions from time to time.

I also want to thank Mr. Saleemuddin Ahmad for preparing maps and diagrams, Mr. Zakir Husain for his help in the consultation of relevant literatures, and Mr. Mohd. Fazal for typing the thesis.

I must also put on record my gratitude towards my brothers Dr. M. Tariq, Mr. M. Ghazali and
Mr. Masood Ahmad, sister-in-law Mrs. Shirin Tariq and sisters for their love, encouragement and inspiration without which this work would not have been possible. The endurance of my wife Mrs. Reshma Safdar is praiseworthy who made no complaint for her desolation and solitude during the vast course of this study. I should also be grateful to my hostelmates and friends Messieurs, Shafiqullah and Zafar Eqbal for their trustworthy and uninhibited help and boost in this direction.

Financial assistance from the University Grants Commission, New Delhi, in the form of a Junior, and subsequently a Senior Research Fellowship for carrying out the present work is gratefully acknowledged.

Mohammad Safdar Azam
