Personal Vitae

A. K. Majumdar

I happen to belong to an enlightened Indian Hindu family and hail from that part of undivided Bengal, which now constitutes the Eastern wing of Pakistan. My father, Dr. U.K. Majumdar, after serving as a medical officer for more than thirty years in a remote Tea garden concern in upper Assam, has recently settled down at Barrackpore, a sub-divisional town in the State of West Bengal, India.

I had my early education at Dibrugarh, Assam and later on, moved to Aligarh for securing my B.Sc. and M.Sc., degrees from the Aligarh Muslim University. Being greatly inspired by my father's long cherished desire to see one of his two sons going for advanced studies, I decided to join research at the Aligarh Muslim University, Aligarh, shortly after receiving my M.Sc. degree.

I have the pleasure to acknowledge the moral strength and support which I received from my wife, Mrs. Namita Majumdar, who played an important role during the accomplishment of this work.

I feel a deep sense of gratitude to my father and of thankfulness to my wife for their good wishes at the completion of this project. I also avail of this opportunity to dedicate the thesis to my revered father, who has been a strong source of inspiration to me since my childhood.
