LIST OF FIGURES

Figure 1. Tectonic Framework of Western Margin Basins of India (modified from Biswas, 1987).

Figure 2. Geological map of Kachchh Basin (after Biswas S. K., 1977).

Figure 3. Tectonic Framework of Kachchh Basin (after Biswas, 1982).

Figure 4. Geological Map of Jhurio Dome (after Bhalla and Talib, 1991).

Figure 5. Lithostratigraphic section measured at Kaila River cutting.

Figure 6. Lithostratigraphic section of measured at Sonwa Nala cutting.

Figure 7. Lithostratigraphic section measured at Badi Nala cutting.

Figure 8. Lithostratigraphic section measured at Bhurud River cutting.

Figure 9. Bivarient plot of (a) Mean-size versus Standard Deviation (b) Mean-size versus Skewness (c) Mean-size versus Mean Roundness (d) Mean Roundness versus Sorting (e) Mean-size versus Mean Sphericity (f) Mean Sphericity versus Sorting of Dhosa Sandstone Member, Kachchh Basin.

Figure 10. Bivarient plot of (a) Mean-size versus Standard Deviation (b) Mean-size versus Skewness (c) Mean-size versus Mean Roundness (d) Mean Roundness versus Sorting (e) Mean-size versus Mean Sphericity (f) Mean Sphericity versus Sorting of Athleta Sandstone Member, Kachchh Basin.

Figure 11. Bivarient plot of (a) Mean-size versus Standard Deviation (b) Mean-size versus Skewness (c) Mean-size versus Mean Roundness (d) Mean Roundness versus Sorting (e) Mean-size versus Mean Sphericity (f) Mean Sphericity versus Sorting of Ridge Sandstone Member, Kachchh Basin.

Figure 12. Bivarient plot of (a) Mean-size versus Standard Deviation (b) Mean-size versus Skewness (c) Mean-size versus Mean Roundness (d) Mean Roundness versus Sorting (e) Mean-size versus Mean Sphericity (f) Mean Sphericity versus Sorting of Purple Sandstone Member, Kachchh Basin.

Figure 13. Lateral and Vertical Facies Variation at Jhurio Dome, Kachchh Basin.

Figure 14. Envisaged Depositional Model for Jhurio Dome, Kachchh, Gujarat.

Figure 15. Transgressive - Regressive cycles at Jhurio Dome, Kachchh Basin.
Figure 16. Classification of sandstones of Jhurio Dome, Kachchh Basin, according to Folk’s (1980) scheme.

Figure 17. Bivariant log/log plot for Jhurio Dome sandstones, Kachchh Basin, according to Suttner and Dutta (1986).

Figure 18. Classification of Jhurio Dome sandstones, Kachchh Basin, according to Basu et. al., (1975).

Figure 19. Qt-F-L plot of Jhurio Dome sandstones, according to Dickinson (1985).

Figure 20. Qm-F-Lt plot of Jhurio Dome sandstones, according to Dickinson (1985).

Figure 21. Qp-Lv-Ls plot of Jhurio Dome sandstones, according to Dickinson (1985).

Figure 22. Qm-P-K plot of Jhurio Dome sandstones, according to Dickinson (1985).

Figure 23. The relationship between MCP and depth of burial on the three bivariate (A, B, C) determined for Jhurio Dome sandstones. The plot (D) is of Porosity loss due to compaction v/s porosity loss due to cementation.

Figure 24. Bivariant plopt of texture and compaction parameters with exising optical Porosity (A, B, C) and with minus cement porosity (D, E, F) for Sandstones of Jhurio Dome.
