Acknowledgement

It gives me immense pleasure and privilege to thank Dr. V.P. Dimri, Director, National Geophysical Research Institute for giving me the kind permission to carry out my doctoral research at NGRI. He has this special quality of encouraging and promoting young talents for advanced research and I am one of the beneficiaries of his support and encouragement.

It is difficult to overstate my gratitude to my Research Supervisor, Dr. Shakeel Ahmed, Senior scientist and Team Co-Leader, Indo-French Centre for Groundwater Research, NGRI. With his enthusiasm, his inspiration, and his great efforts he helped to make Hydrogeology/Geostatistics fun for me. Throughout my thesis-writing period, he provided encouragement, sound advice, good teaching, good company, and lots of good ideas. I would have been lost without him. To me, he is not only a great advisor and professor, but also a great guardian. I thank him for all his encouragement and patience, his care, understanding and respect for his students. I believe I have greatly benefited from this opportunity to work with him and will continue to see that benefit through my entire career.

I would like to express my deep and sincere gratitude to my supervisor, Dr. Sarwar Rais, Reader, Department of Applied Geology, Aligarh Muslim University. His wide knowledge and logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis. I would like to thank Professor Mahshar Raza, Chairman, Department of Geology at Aligarh Muslim University for making my Ph.D. registration formalities easier during my absence at Aligarh.

I would also like to thank the CSIR-UGC Selection and Award Bureau for granting me scholarship as a Junior Research Fellow and then as a Senior Research Fellow, which has supported me during my three years of research, and also my sincere thanks to the Embassy of France in India for offering me fellowship to work in France for a period of 4 months that provided me the opportunity to work with internationally renowned scientists and an exposure to the advance research.

I am deeply grateful to Dr. Benoit Dewandel for his detailed and constructive comments and assistance during my research trip to Montpellier, France.
I wish to express my warm and sincere thanks to Dr. Jerrome Perrin, French Team Co-Leader of the IFCGR, for his valuable advice and friendly help. His extensive discussions around my work have been very helpful for this study.

I would like to thank the many people who have taught me Geology: my Graduate and Post-graduate Lecturers and Professors at Aligarh Muslim University (especially Dr. M.E.A. Mondal, Dr. Rashid Umar, Dr. Sheikh Rashid and many others) for their kind assistance, giving wise advice, helping with various applications, efforts to explain things clearly and simply, and so on.

During this work I have collaborated with many colleagues for whom I have great regard, and I wish to extend my warmest thanks to all those who have helped me with my work in the office and field both. My sincere gratitude Dr. Dewashish Kumar, Dr. Cedric Massacre, Dr. Faisal Kamal Zaidi, Shazrah Owais, Haris H. Khan, Wajid, Surendra Atal, Dr. P.D. Sreedevi, Dr. Tanvi Arora, Dr. Subhash Chandra, Sushobhan Dutta, K. Devi, Apsar, Khaleel bhai and Jr. Khaleel. I want to extend my gratitude to my friends Aamir, Mushtaq, Kisli, Vishal bhai, Bilal, Ashish, Ravi Bhai, and all others who have given me all kinds of good suggestions in my personal development.

I cannot end without thanking my family, on whose constant encouragement and love I have relied throughout my time at the Institute. I am grateful to my parents, my brother and sister and all my relatives and friends. Their unflinching courage and conviction will always inspire me, and I hope to continue, in my own small way, the noble mission to which they gave their lives. It is to them that I dedicate this work.

Aadil Nabi
NGRI, Hyderabad
