ACKNOWLEDGEMENTS

I lift up my eyes to the hills
Where does my help come from?
My help comes from the Lord
The makers of heaven and earth

(anonymous)

I have first to bow my head in front of the Almighty God for his constant shower of blessing, which made this task accomplish bearing all phase of ups and down.

At the outset, I consider my humble and earnest duty to place on record my greatest sense of gratitude to Dr. Shadab Khurshid, Chairman, and Department of geology, AMU’ Aligarh, my supervisor, who offered his erudite and scrupulous guidance through the tenure of this work. He is not only savant or sapiettt but a munificent personality too. Without his assiduous and prudent interest, the work could not have been crystallized.

I am thankful to Mr. K. S. K. A. M., former chairman, Department of Geology, for kindly providing necessary facilities that I need during my research work.

Words like “dedication” “gratitude” and “indebt ness” have less value for parents. The contentment of parents are much ahead than these words, when people acknowledge the success of their children. And at this junction I would like to remember my parents, whom I believe will bless for the iota success of my life. I am indeed grateful to brothers for their moral support and to my beloved sister for her encouragement.

I am grateful to Dr. Shakeel Ahmad for the cooperation and invaluable assistance during the analysis in the geochemical lab.

In addition to many individual I am particularly indebted to my friend Dr. Ashish Dutt, Mazhar Noor( Designer,IBM), Mr. Faz Ahmad (Engg.Faculty) Mr. Dilip Kumar who were kind enough in providing any assistance whenever I required.

A number of benevolent persons have helped me during the course of this work in their capacities e.g. Dr. Akram Javed, Dr. Aahboob (Civil Engg.), Prof. Jameel(Civil Engg.), Prof. Salauddin Shah( Civil Engg.) etc. I owe my sense of respect and regard to all of them.
Whenever states of melancholy and despondency prevailed, my candor friend, Pranjal saved me from falling into abyss of despair, altruistic help and friendly advices reanimated me and thus I could complete this uphill task of research. It is better to thanks only in silence.

Financial assistance in the form of Fellowship by University Grant Commission (New Delhi) is highly acknowledged.

I must acknowledge Mr Kafeel A. Khan, Typist, Champion Market, Aligarh Muslim University, Aligarh who painstakingly typed my manuscript.

Last but not least I am greatly indebted to all of them who helped me directly or indirectly during the course of this work.
