ACKNOWLEDGEMENTS

I am highly grateful to my teacher and supervisor Prof. Naseem A. Zaidi, for affectionate encouragement, expert advice and searching criticism throughout the completion of this work. He has always been a source of inspiration and unfailing support, which encouraged me to continue this work even under odd circumstances. Without his unfailing support, the present work would have not been completed in the present form.

In the course of this work I received many helpful comments and suggestions from my colleagues and friends to whom I owe a special debt of gratitude. A special note of thanks is due to Dr. Gangadhar Jha, Director, National Institute of Urban Affairs, Prof. Shyam Nath, National Institute of Public Finance and Policy, with whom I had fruitful discussions which helped me to crystalize my ideas. A special thanks to Dr. Nisar A. Khan for helping me with intellectual insight and friendly critiques and to Mr. Najmuddin, an IES officer for being kind enough to do the computational work.

My thanks are due to the staff of National Institute of Public Finance and Policy, New Delhi, National Institute of Urban affairs, New Delhi and Indian Institute of Public Administration, New Delhi, for their valuable cooperation.

I am also highly grateful to Mr. S. Waheed Abbas, who typed the manuscript very patiently.

In the end I would like to dedicate this volume to my family and a personal friend of mine Dr. Sarwar Alam, who have always been a source of strength and motivation for me.

[ AKRAM AHMAD KHAN ]
