ACKNOWLEDGEMENTS

In the name of almighty "AllAH" the most beneficient and merciful who guided and showed me the right path and blessed me with the strength to complete the present research in the best forms.

I am short of wards to express my deepest sense of gratitude to my favourite teacher, guide and supervisor, Prof. A. Farooq Khan, (Chairman of the dept. and Dean of the faculty and coordinator, D.S.A. Programme of U.G.C.,) for his timely and kind guidance, valuable advice and ever encouraging attitude at each stage enabling me to complete the research thesis. It is worthmentioning that without his direction, dedication and keen interest the present thesis would not have seen the light of the day.

I am specially thankful to Prof. Mohfoozur Rahman, to whom undersigned owes a lot for his unconditional material, moral and mental support, Dr. Mohd. Asif Ali Khan, Dr. Ziaul Ghani, Dr. Jawad Alam Khan, Dr. Hifzur Rahman, Dr. Sibghatullah Faruqi, Dr. Z.U. Kharowala, Dr. Abdul Qayyum Khan, Dr. Mohsin Khan, Dr. Imran Sidiqui and Dr. Bilgrami who motivated and helped me in several ways from time to time to complete the research.

MOHD. ASIF KHAN
