

ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude to Dr. M. Ahmad and Professor S.M. Osman, for their constant guidance in all the stages of preparation of this work.

My indebtedness to Professor M.S. Ahmad, can in no way be mitigated considering the help he extended to me in various discussions concerning these researches.

I am also extremely grateful to Professor W. Rahman, Head of the Department of Chemistry, for providing me necessary laboratory facilities during completion of the work.

I am sincerely thankful to Mr. Mughisuddin Ahmad for his all-out help to me while preparing this thesis. The continued encouragement, co-operation, and help I received from Dr. Ashfaq A. Ansari, Dr. Fasih Ahmad, and fellow researchers has been much beyond my expectation, for which the author is thankful to all.

My acknowledgements are more due to Mr. I.A. Jilani for typing the script. Finally, I gladly acknowledge the Indian Council of Agricultural Research, New Delhi, for financial assistance.
