Acknowledgements

I take this opportunity with much pleasure to thank all the people who have helped me through the course of my journey towards producing this thesis. The work in this thesis was carried out at Center for DNA Fingerprinting and Diagnostics (CDFD), Hyderabad. My utmost gratitude goes to my thesis advisor, Dr. Ranjan Sen for his constant guidance, help and support. His hard working nature and persistent attempts to solve the problems really motivated me to face the challenges. He was always accessible and willing to help his students with their research. I also thank other members of doctoral committee Drs. R. Harinarayanan and Rupinder Kaur for their helpful suggestions.

I gratefully acknowledge Dr. J. Gowrishankar, director CDFD for his advice and intellectually stimulating discussions. I am grateful to the Vice Chancellor, Registrar and the Head, Dept of Biotechnology of the Manipal University for allowing me to register as a graduate student. I am also very grateful to Dr. Sanjeev Khosla, head of laboratory of Mammalian Genetics and Dean, Academics section, CDFD for his constant encouragement throughout this work. I would like to acknowledge the CDFD staff of instrumentation, academic, accounts and administrative section for providing the necessary support for this research.

I am grateful to the Indian Council of Medical Research (ICMR) for providing me with Junior and Senior research fellowships, during the period of my work. The research at our laboratory has been supported financially by research grants to Dr. Ranjan Sen from DBT, DST and CDFD. I would like to express my gratitude to all these institutions.

I would sincerely like to thank all my lab members. Without their help and valuable inputs my thesis completion would have been impossible. My seniors Jisha, Ghazala, Rajesh and Amitabh have been a constant support and always there for help. During the first year of my joining, Jisha and Amitabh had helped me with all the techniques. Amitabh has been an elder brother to me rather than a senior. He is a very great person, always helping others in their need without any expectations. I did so much ‘masti’ with him and have always teased him for fun. Thank you very much Amitabh for your support and help in every aspect.
Acknowledgements

I would also like to thank my juniors, Zuhaib, Vishalini, Gairika, Richa and Haffeza for their constant help and support. Gairika, Richa and Vishalini, thank you for helping me with my thesis writing and being part of my masti in lab. Gairika is the one whose leg pulling I’ve enjoyed throughout the Ph.D. Thank you Zuhaib for giving me computational knowledge.

Other present lab members that I have had the pleasure to work with or alongside are Shweta, Kalyani, Sapna, Jayavardhan, Ramadevi, Gowrish and Krishna. I am especially grateful to Sapna, Gowresh, and Krishna for their sincere efforts in organizing the lab and for all the help provided by them in carrying out the experiments. Shweta, thank you for giving me moral support and reviewing my thesis during thesis writing. Other past lab members that I have had the pleasure to work with or along side are Anoop, Dipak, Nisha, Bibhushita, Shalini, Debashish. Big thanks and good luck to all the members of my lab and I pray to God that this love and feelings for each other remains forever.

I am also thankful to my batchmates, Amitava, Bhavik, Adeel, Manjaree, Ratan, Rikky, Rachna, Raju and Ajeet for their constant help. Amitava and Bhavik were the best friends that one can possibly have. They have been with me through thick and thin, and it is impossible to thank them in words. I would also like to thank cricket players, Amitava, Bhavik, Zuhaib, Vivek, Ashiq, Zafar, Varun, Swapnil, Pankaj, Praveen, Rajkumar, Muddashir, Rajeev, Atul and Nandan, who maintained a healthy balance between work and play.

I like to thank Punitha ma’am and Mr. Santosh at the Academics section for being so helpful and make student’s life so easy. I would also like to thank Mr. Ramaiah and Mr. Neeli Sreenivas. I would like to acknowledge the CDFD staff from instrumentation, accounts and administrative section for providing the necessary support for this research. I would like to acknowledge the housekeeping staff of CDFD, who spend all their time in keeping our institute always neat and clean.

I acknowledge Drs. Anupama and Hari Narayanan for their advice and their willingness to share their ideas with me, which was of great value for me in designing various in vivo experiments during this research. I was fortunate to have seniors like Pankaj,
Tabrej, Vishal, Khalid, Shivalika, Gaurav, Shashikiran, Amit, Nazia, Garima, Atul, Swarna, Arpita and Nandan with whom I had extensive discussions about my work and their guidance have been of great value in this study.

I am grateful to my Papa and mummy for their unconditional love, support and allowing me to be as ambitious as I wanted. I am deeply obligated to Bhabhi and Bhaiya for their care and support. I can’t express my gratitude for my wife Shashikala in words, whose unconditional love has been my greatest strength. I cannot be what I am without her who stands beside me in all my times. Without her encouragement and understanding it would have been impossible for me to finish this work.

In the last, I just want to apologize if inadvertently I have missed any precious contribution. I will always remember the cool working and familiar atmosphere of CDFD. I will take all the fond memories in my heart which will never go fade.
