ACKNOWLEDGMENTS

This is an important moment of my life when I have to acknowledge all those concerned with this work. I do not have sufficient words to frame a sentence in the honor of Dr. Ali Mohammad, my supervisor. Dr. Ali Mohammad (Reader, Department of Applied Chemistry, A.M.U., Aligarh) guided me, supported me and encouraged me constantly during my research period. I am grateful to Prof. Mohammad Ajmal, Chairman of the Department, for providing research facilities.

I wish to express the best of my thanks to my colleagues; Dr. (Mrs) S. Anwar, Dr. J. Ahmad, Dr. S. Tiwari, Dr. M. A. Majid Khan, Dr. (Mrs) Rehana Yousuf, Mr. M. Najar P.A, Ms. Eram Iraqi; and Mr. Dheeraj Kumar for their cooperation and help as their role was indeed crucial.

It is beyond my capacity to express my gratitude to mother Gaoma and father, Sh. Shiv Ram Singh. I will always be indebted to other family members, relatives and my guardians, Smt. Indira and Major Chandresh Singh for their affection, encouragement and moral support.

Finally, the thanks are also due to Mr. Rakesh for typing this thesis.

(JAY PAL S. CHAHAR)
