ACKNOWLEDGEMENT

It is my profound pleasure to express my deepest sense of gratitude to Dr. A.A. Khan, Department of Applied Chemistry, Aligarh Muslim University, Aligarh for his kind supervision, valuable guidance and stimulating discussions. I also express my indebtedness to Dr. K.G. Varshney, Professor, Department of Applied Chemistry, for his keen interest, valuable suggestions and creative criticisms throughout this work. I would like to thank Prof. M. Ajmal, Chairman, Department of Applied Chemistry for providing necessary research facilities.

I am also grateful to Dr (Mrs) Upma Gupta, Miss. Namrata Tayan and Mr. A. H. Pandit of our research group who have been very cooperative and helpful throughout these studies. Thanks are also due to Dr. P.S. Tomar, Mr. Sudhir Kumar Singh and all my friends for their valuable suggestions, cheerful cooperation and constant encouragement.

I take this opportunity to express my sincere thanks to Prof. M. Ilyas, Chairman, Department of Chemistry, for his most valuable help and constant encouragement. My sincere thanks are also due to Dr. R.K. Sharma and Dr. O.P. Bansal, Department of Chemistry, D.S. Degree College, Aligarh for their all time useful discussions.

I am short of words to express my sincere gratefulness to Sri Kunwar K.P. Singh and Smt. Manorama Singh for their blessings, encouragement and attention at every stage of my research career which provided me the necessary enthusiasm and spirits to complete the work.

Some of the instrumental work was performed in the laboratories of Nuclear Atomic Power Plant, Narora for which I sincerely thank to Mr. C.M. Kothari, Director, and Mr. Vinod Kumar, Engineer, NAPP, Narora. I am also thankful to Dr. B.K. Puri, Professor, I.I.T, Delhi for his help in doing elemental analysis.

Last but not the least, I express my deepest sense of gratitude to my parents and brothers for their blessings, love, affection encouragement and constant financial support during the whole tenure of this study.
