ACKNOWLEDGEMENT

I am extremely beholden to my esteemed supervisor, Dr. Mohammad Abul Qasim whose superb guidance, valuable and timely suggestions and constructive criticism brought this work to fruition. Despite his busy schedule and innumerable commitments, he painstakingly guided me through many difficult situations. His affectionate instinct and constant encouragement were always a boon to me.

I owe my gratitude to Prof. Rashid Ali, Chairman of the Department, for providing me the necessary facilities. He really went out of his way to help me throughout this study. Thanks are also due to prof. Salahuddin, Ex-Chairman of the department for his kind help.

A special vote of thanks goes to Dr. Masroor A. Baig, Reader, Department of Biochemistry, University of Kashmir, for his ideal suggestions and for providing facilities for fiscosity experiments.

I have to grope for words to express my sincere gratitude to my friend and colleague, Khalid Majid Fazili, who really stood by me at every instant.
and was a source of inspiration at every moment we spent together in the laboratory.

My sincere thanks are due to Dr. Saad Tayyab and Dr. Manzoor A. Shah for their kind cooperation and valuable discussions. Words fail me to express my indebtedness to Krishnan Hajela, Najma Ali, Renu Tyagi and Sadhana Sharma for their kind cooperation.

It gives me immense pleasure to express my thanks to my friends Dr. Javid Baqal, Dr. Manzoor Bhat and M/s Shafaat Qadri, Naseer Husain, Ishtiaq Ahmad and Zameer Makhdoomi for their help and moral support. My thanks are also due to Mr. Tamizuddin for his technical help throughout my stay in the department.

Finally I feel obliged to my family members whose unfailing love and encouragement made me to reach this stage.

Financial assistance from Indian Council of Medical Research in the form of Senior Research Fellowship is gratefully acknowledged.
