List of Tables, Figures and Boxes

Chapter 1: Introduction

Box 1: Comparison of Methods in Term of Costs, Time, Skill Requirement, and Susceptibility to Misreporting.

Chapter 2: Basic Concepts of Food Security

Figure 1: Food Security Indicators.
Box 1: The Dimensions of Food Security: Critical Variables.
Figure 2: Nutritional Security.
Figure 3: Factors Affecting Household Food Security.
Table 1: International Fund for Agricultural Development has summarized the factors, which are affecting household food security in table form.
Figure 4: National Food Security availability does not mean individuals are free of hunger. A simplified diagram adapted from Smith’s (2002) version of Frasenburger and UNICEF’s diagram.
Box 2: Dimensions of Food Insecurity.
Figure 5: Relationship of Food Security, Dietary Intake, and Nutritional Status.
Figure 6: Malnutrition Infection Cycle.

Table 1: World Population, 1995-2020.
Figure 1: Urban and Rural Population Average Annual Increment (million) in Developing Countries, 1975-2020.
Figure 2: Annual Growth Rate of High-value agriculture production, 2004-2006.
Figure 3: Total Demand for Cereals, 1995-2020.
Figure 4: Shares of increase in Global Demand for Cereals 1995-2020.
Figure 5: Growth in Cereal Production due to Yield Improvement, 1995-2020.
Figure 7: Net Cereal Imports of major Developing Region, 1995-2020
Table 4: Changes in World Prices of Feedstock crops by 2020 under two scenarios compared with baseline level (%).
Table 5: Number and Percentage of Undernourished in Developing World.

Chapter 4: Measuring India’s Food Insecurity: Individual Calorie Intake Approach.

Table 1: Growth Rates of Population and Production in India from 1951 to 2006.
Table 2: Per Capita Production of Food Grains in India.
Table 3: Recommended Dietary Allowances for Indians.
Table 4: Net Availability of Food grains in India from 1951 to 2005 (Grams per capita per day).
Table 5 Changes in Average Per Capita Intake of Calorie, Protein (Grams) and Fat Per Diem over Different NSS Rounds.

Figure 1: Per Capita Per Diem Intake of Calorie (in Kcal).

Table 6: Calorie Intake in Rural Areas under Different Monthly per Capita Income Classes, NSSO 61st Round (2004-05).
Figure 2: Calorie Deficiency (Depth of Hunger) for Different Monthly Per Capita Expenditure Classes in Rural Areas.

Table 7: Calorie Intake in Urban Areas under Different Monthly per Capita Income Classes, NSSO 61st Round (2004-05).
Figure 3: Calorie Deficiency (Depth of Hunger) for Different Monthly Per Capita Expenditure Classes in Urban Areas.

Figure 4: Undernourishment in India and Around the World, 2001-03 (millions).

Table 8: Prevalence of Undernourishment

Table 9: Estimates of Poverty in India

Table 10: Food Availability, Poverty and Food Aid in India.

Table 11: Per Capita Intake of Calorie in Rural Areas by States in Different NSS Rounds.

Table 12: Per Capita Intake of Calorie in Urban Areas by States in Different NSS Rounds.

Table 13: Percent Expenditure on Food to Total Expenditure by Different Monthly Per Capita Expenditure Classes.

Table 14: Expenditure on Food and Non-Food Items in Urban and Rural Areas in Different NSS Rounds.

Table 15: Share of Expenditure on Food grains, Fruits & nuts /Vegetables, Milk, Meat Egg and Fish in Total Food Expenditure.

Chapter 5: Measuring India’s Food Security Problem: A Risk and Vulnerability Approach.

Box 1: Sources of Risks of Food Insecurity and Affected Population.
Table 1: Food Security risk Assessment in Rural Areas.
Table 2: Food Security risk Assessment in urban Areas
Table 3: Ratio of Non-Food to Food Expenditure for Different MPCE classes in Rural Areas.
Table 4: Ratio of Non-Food to Food Expenditure for Different MPCE classes in Urban Areas.
Table 5: Risk level of Different Monthly Per Capita Expenditure classes in Rural Areas, NSS 60th Round.
Table 6: Risk level of Different Monthly Per Capita Expenditure classes in Urban Areas, NSS 60th Round.
Table 7: Coefficient of variation in Area, Productivity and Yield of major food grains in India.
Box 2: ‘Twin-Track Approach’ For Fighting Hunger Combines Sustainable Agricultural and Rural Development with Targeted Programmes for Enhancing Direct Access to Food for the Most Needy.

Chapter 6: Indian Agriculture: Current Scenario and Perspective Challenges.
Box 1: Objective of Agriculture Development Policy in India.
Table 1: Declining Per Capita Availability of Land (Land-man ratio).
Table 2: Growth Rates of GDP Agriculture and Non-Agriculture Before and After Reforms.
Table 3: Growth Rate in Output of Various Sub-sectors of Agriculture at 1993-94 Prices.
Table 4: Production of Food grains in India from 1950-51 to 2005-06.
Table 5: Growth Rate of Indian Agriculture from Pre-Green Revolution to Period after Economic Reforms.
Table 6: Growth Rates of Area, Yield and Production (percent/annum).
Figure 1: International Comparisons of Yield of Rice Crop, 2004-05.
Figure 2: International Comparisons of Yield of Wheat Crop, 2004-05.
Figure 3: International Comparisons of Yield of Maize Crop, 2004-05.
Table 7: Compound Growth Rate of Area Irrigated in India.
Table 8: Gross Capital Formation in Agriculture (1993-94 prices).
Figure 4: Model Relationships between Public Spending and Poverty.
Table 9: Comparison of Studies for Demand Projections for Food Grains in 2000 A.D.
Table 10: Projected Direct Demand (at 5% GDP) for Food Grains in India.
Table 11: Projected Indirect Demand (million tones) for Food grains in India.
Table 12: 2020 Food Demand Projection Based on the Definition of Food Security.
Table 13: Comparison of Studies for Demand Projections for Food Grain in 2020.
Table 14: Demand for food grains by 2020 in rural and urban areas.
Table 15: Demand for Cereals in India, 1990-2020.
Table 16: Projected Total Cereal Requirement for India by 2020.
Table 17: Annual Compound Growth Rates in Area, Production and Yields of cereals in India.
Table 18: Alternative cereal supply projections for 2020, India, (million metric tons).
Table 19: Projected Cereals Supply, Demand and Net Trade, India, 1995 and 2020. (million tons).
Table 20: Projected Cereal Gaps for India in 2020 under Alternative Demand and Supply Scenarios (Million Metric tons).

Chapter 7: Livestock Revolution and Food Security in India
Table 1: Projections of Populations in India by 2020, (million).
Figure 1: Trends of Urbanization in India from 1901 to 2001.
Table 2: Urbanization Projection in India by 2020.
Table 3: Calorie Intake of the Grains, Non-Grains and the Animal Products Food Categories.
Table 4: A Comparison of Differences in Elasticities of Livestock Products in Rural and Urban India.
Table 5: Share of Expenditure on Food grains, Fruits/Vegetables, Milk, Meat Egg and Fish in Total Food Expenditure.
Table 6: Demand Projections for Livestock Products by 2020 in India by Different Studies (Million tones).
Table 7: Growth Rates of major feed crops in India in 1990s and 2000-06.
Table 8: Projected Trends in Use of Cereals as Feed, 1993-2020.

Chapter 8: Impacts of Food Insecurity: HIV/AIDS
Table 1: Global Summary of the AIDS Epidemic, 2007.
Table 2: Incidence of AIDS: Regionwise.
Figure 1: India as percent of World Population and Global and HIV/ AIDS Prevalence, 2005.
Figure 2: Incidence of HIV/AIDS in India.
Figure 3: Percentage Distribution of HIV/AIDS Infection by Age in India.
Figure 4: The Vicious Cycle of HIV/AIDS and Malnutrition.
Figure 5: HIV/AIDS and People’s Livelihood.
Figure 6: AIDS, Food Crises and Famine.
Table 3: Showing HIV Prevalence and Food Insecurity.
Box 1: Illustrative Summary of Commonly Reported Impacts of HIV/AIDS on Livelihood Assets, and Responses, at Household and Community Levels.

Chapter 9: Biotechnology and Food Security

Figure 1: Trends in Biotechnology
Box 1: Summary of Applications of Modern Biotechnology to Agriculture.
Box 2: Potential Benefits from Plant Biotechnology.
Table 1: Global Area of Transgenic Crops, 1996 to 2007 (Million Hectares).
Figure 2: Global Area of Transgenic Crops, 1996 to 2007 (Million Hectares).
Figure 3: Global Area of Transgenic Crops, 1997-2007: Industrial and Developing Countries.
Table 2: Global Area of Transgenic Crops, 1997 to 2007: Industrial and Developing Countries (Million Hectares).
Table 3: Global Area of Biotech Crops, 1996 to 2007: By Country (Million Hectares).
Table 4: Global Biotech Trait of main Crops in 2006
Figure 4: Global Adoption Rates (%) for Principal Biotech Crops, 2007.
Box 3: Chronology of Development and Approval of Bt-Cotton in India.
Table 5: Trend of growth of BT. Cotton in India
Table 6: Production and Yield of Cotton in India.

Chapter 10: Risks and Benefits Analysis of Agricultural Biotechnology

Box 1: Summary of Perceived and Genuine Risks of Genetically Engineered Foods and Crops.
Box 2: Summary of Perceived and Genuine Risks of Genetically Engineered Foods and Crops.
Box 3: Summary of Perceived and Genuine Risks of Genetically Engineered Foods and Crops.
Box 4: Summary of Perceived and Genuine Risks of Genetically Engineered Foods and Crops.
Table 1: Global Farm Income Benefits From Growing GM Crops 1996-2005, (Million US $).
Table 2: GM crop farm income benefits 1996-2005 selected countries (million US$).
Table 3: GM Crop Farm Income Benefits 2005: Developing Versus Developed Countries (Million US $).
Table 4: Cost of Accessing GM Technology (in % Terms) Relative to the Total Farm Income Benefits, 2005.

Table 6: Reduction in ‘environmental impact’ from changes in pesticide use associated with GM crop adoption by country, 1996-2005, in selected countries (% reduction in field EIQ values).

Table 7: GM crop environmental benefits from lower insecticide and herbicide use, 2005: Developing versus developed countries.

Table 8: Impact of GM crops on carbon sequestration impact in 2005 (car equivalents).

Table 9: Policy Options toward GM Crops.

Table 10: Policies toward GM Crops in India.
