ACKNOWLEDGEMENT

It is a pleasure for me to acknowledge my deep sense of gratitude to Dr. A. Austin, Senior Cereal Physiologist, Division of Genetics, Indian Agricultural Research Institute, New Delhi, for his guidance and encouragement during the entire course of this investigation.

I am equally grateful to Prof. Reayat Khan, Head of the Department of Botany, Aligarh Muslim University, Aligarh, for his valuable guidance and suggestions throughout the course of this investigation.

Mr. Daljit Singh, Statistician Division of Genetics, I.A.R.I., has taken keen interest throughout the progress of this work. His help has proved especially valuable in connection with the statistical aspects of these investigations. I place on record gratitude to him for all the help and encouragement he has given me.

My thanks are also due to Dr. M.S. Naik who helped in the estimation of amino acids, Dr. A.K. Kaul and Dr. Y.P. Abrol, Mrs. Vijay, Miss Meena, Miss Dhar, Mr. Uprety and Mr. Hanslas for their keen interest in the study.
