ACKNOWLEDGEMENT

I express my deep sense of gratitude and appreciation to my supervisor Dr. S.M. Jairajpuri an eminent professor. His valuable guidance, keen interest and moral support extended to me from time to time is gratefully acknowledged.

With great pleasure I truly acknowledge the guidance rendered to me by Dr. S.A. Ranade. It is his constructive criticism, fruitful discussions and critical analysis that has helped me to give this thesis a proper shape. I am fortunate enough to have benefited from his enormous knowledge. Our long discussions gave direction to my work and has immensely developed confidence to work independently. And above all his co-operative and helpful nature is highly appreciated. It is much more than thanks that I acknowledge his guidance.

I thankfully acknowledge with respect the invaluable advice and help given to me by Dr. P.V. Sane, an eminent scientist and former Director of National Botanical Research Institute.

It was a pleasure working in the environment consisting of senior scientist like Dr. R. Tuli, Dr. P. Nath and Dr. V.K. Kochhar. I am thankful to Dr. Anirudha, Dr. Prabodh, Dr. Vidhu, Dr. Saxena, Dr. Mamta and Mr. Pramod for their help and co-operation.

It was a wonderful time while working in a friendly atmosphere of all my friends Rao, Reddy, Anjali, Aquila, Amrita, Esha, Meetu, Alok, Vipin, Sangeeta, Amarnath, Ashish, Puneet, Mehra, Sandhya, Archana, Sunita, Anjali Verma and P.K. Singh. Their company have always been very pleasant and I sincerely thanks them for their help and co-operation extended to me during the tenure of my work.

I am also thankful to Nandlal, Moti, RamAwadh, Ram Kumar, Dilip and all technical staff for small but important help in the lab. Thanks to Shahid Bhai for his academic help and unfailing courtesy.

I am dutifully thankful to Director NBRI and Director Institute of Agriculture Microbiology for allowing me to use the available facilities and to submit the thesis. The
financial support in the form of Junior and Senior Research Fellowships during the tenure of work, from Council of Scientific and Industrial Research is acknowledged.

I feel great pleasure to express deep sense of thanks to my husband, Faiz. I do not recall a single moment when he was not there at trying times to boost my morale and motivate me. He made me smile through it all. His support is worth being cherished, for words would not substitute for his love and care.

Last but not least, it is difficult to express my gratitude towards my parents, brother, sister and my in-laws, who wanted to see the shape of this thesis. It is because of their support and encouragement provided, which persuaded me to accomplish this task, which otherwise would have been difficult and no thanks are enough to acknowledge this.
