I would like to take this opportunity to acknowledge all those whose encouragement and supports were instrumental in completion of this thesis. I have many people who helped me to go on from the beginning to the completion of my thesis. I would like to express my deepest gratitude to all of them.

First and foremost many thanks go to my thesis supervisor, Dr. Mohammed Naved Khan, who constantly provided me with brilliant advice, read many drafts, and took the time to thoroughly critique and edit my work. His sharp and versatile intelligence has saved me from several difficulties that I might have surrendered to from the scratch till the end. Starting from collecting literature on my subject, data collection, data feeding, its analysis and finally concluding my thesis, he has been there throughout. Thank you for not letting me settle for anything less than my full potential, and for always pushing me to do my very best.

Thanks also to his wife and my teacher, Ms. Feza Tabassum Azmi, who took interest in my work and gave me valuable suggestions wherever needed. I express my thanks to Prof Javaid Akhtar, Chairman, Department of Business Administration and Dean, Faculty of Management Studies & Research, Aligarh Muslim University, Aligarh (UP), India for lending all possible support in the completion of the thesis.

I shall ever remain grateful to the committee consisting of Prof Javaid Akhtar, Prof M. Khalid Azam, Dr. M. Israrul Haque, Dr. Parvaiz Talib who gave me the opportunity to conduct this research and solidified my intention to pursue this topic of study. My gratitude is also extended to all my teachers who always encouraged me for my work.
Thanks to those people who helped me in collecting my data. To each and every person who gave so generously of their time and allowed me to survey them as subjects for my thesis. You people are the substance of this thesis. Thank you!

I would like to give a special vote of thanks to Mr. Vipin Raj Dutt, my colleague who helped me in tackling the statistical software packages. I am also thankful to my colleague Mr. Kamal Allil for his help and support during the various phases of the study.

To my amazing parents, family and friends who have had to listen to all of my trials and tribulations. Thank you for being there, for your endless backing, especially over the past six months, and for the many, many times you told me I could do it. Thank you all for your unconditional support, for being my source of strength, for always pointing out the light at the end of the tunnel, and for a million other reasons too numerous to name.

I dedicate this thesis to all those without whom I would never have had the courage to begin this program in the first place. For all the help and encouragement you all selflessly gave me whenever I needed it, you all have my most heartfelt gratitude.

But all this has no significance without endorsing a heart felt appreciation to our alma mater Department of Business Administration, Faculty of Management Studies & Research, Aligarh Muslim University, Aligarh (UP), India.

Shamseen Raza Rizvi
