First of my heartfelt gratitude to almighty Allah who provided me the vision and courage to complete this work. He guided me through every thick and thin through innumerable and invisible ways to fulfill this endeavor of mine.

I feel deepest gratitude to my Supervisor Dr. Suhail Sabir (Department of Chemistry) for guiding, supervising and providing me thoughtful insights in the understanding of the subject. I feel short of words to acknowledge his systematic and research approach blended with constructive criticism and innovative ideas that helped me to understand the basics of the research and to overcome many experimental hurdles. Without his able guidance surely this work would have been incomplete.

A special thanks to the Chairman, Department of Chemistry, A.M.U. Aligarh, for providing me the necessary research facilities and material for conducting my experiments.

I am highly thankful to Mr. Muzaffar Afaq for his enquiring nature regarding the progress of my work; he always instilled in me a burning desire to work hard towards my goal. He along with his family was a constant emotional support for me during my stay at Aligarh.

I owe my heartfelt gratitude to Mr. Imran Khan and Mr. Mudassir Rashid Bandey for the help they extended to me in various ways throughout my work. They were really cooperative, supportive and at times loving and caring too to extend their helping hands to me.

My sincere thanks to Dr. Md. Rashid, my senior who was always cooperative and cordial, whenever I needed his guidance in my research work.

My lab mates have been a source of constant inspiration for me. They helped me always sometimes with a constructive criticism and sometimes with their hearty laughs to ease off my tensions. I thank Dr. Sarfaraz, Shams Qamar Usmani, Ishaat Khan, Pradeep Kumar, Tanveer, Zain Khan, Fakhir Jabeen, Farah Khan,
Noorusaba, Sadaf Haneef, Neeti, Saima Sultana, Zoya Zaheer being there for me always whenever their help was needed.

My friends with whom I have lived a life of abandon, fun and understanding. I am highly thankful to, Meraj Alam, Khalida Yameen, Syimul Aapa, Uzma Shameem, Uzma Shakeel, Shazia Waseem, Afifa, Rumana Choudhary, Shahzia Saleem and Mr. Aabid Shalla who filled my world with the charms of their unique personalities. My special thanks to Naushaba Sami, Sadiqa Khanam, Sadaf Afrin, Nazia Malik, Faizul Aapa, Dr. Amodini and Moon Aapi, who filled the gaps in my personality through many invisible marks.

Last but not least I don't have words to express my humble gratitude towards my family, whose unnerving and unending support helped me to fulfil this ambition. Their unrelenting support and blessings made me to follow and chase my dreams. I feel honored to thank my father Mr. Laiq Ahmed and my mother Mrs. Nazakat Begum and my brother Adnan Ahmed who stood by me through every painful and happy moment and made me believe that my world is empty without them. Their constant and unconditional faith in me has really contributed in the culmination of this work. Finally this acknowledgement would have been incomplete without the mention of my grandfather (Late) Rais Ahmed, who was the guiding light of my life. A special thanks to my sisters Mrs. Shabina Tabassum, Mrs. Rubina Tabassum, Ms. Shaheen Laiq and also my brother-in-laws Mr. Burhaan Ahmed and Mr. Shehzad who always gave me a reason to look positive towards every development in my life.

Salma Tabassum
