**Annexure**

Table A.1  ANOVA for pH values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.2  ANOVA for protein content values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.3  ANOVA for TBA value of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.4  ANOVA for ash content values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.5  ANOVA for TPC values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.6  ANOVA for coliforms count values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.7  ANOVA for *Staphylococcal* count values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.8  ANOVA for proteolytic count values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.9  ANOVA for lipolytic count values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.10 ANOVA for Y&M count values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.11 ANOVA for colour score values of meat pickles during 120 days at ambient temperature

Table A.12 ANOVA for odour score values of meat pickles during storage of 120 days at ambient temperature

Table A.13 ANOVA for texture score values of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.14 ANOVA for taste score values of buffalo meat pickles during storage of 120 days at ambient temperature
Table A.15 ANOVA for palatability counts of buffalo meat pickles during storage of 120 days at ambient temperature

Table A.16 ANOVA for moisture content analysis of meat powder during storage of 120 days at ambient temperature

Table A.17 ANOVA for pH values of meat powder during storage of 120 days at ambient temperature

Table A.18 ANOVA for protein content values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.19 ANOVA for fat content values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.20 ANOVA for TBA values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.21 ANOVA for ash content values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.22 ANOVA for TPC values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.23 ANOVA for Staphylococcus count values buffalo meat powder during storage of 120 days at ambient temperature

Table A.24 ANOVA for proteolytic count values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.25 ANOVA for Y&M count values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.26 ANOVA for colour score values of buffalo meat powder during storage of 120 days at ambient temperature

Table A.27 ANOVA for odour score values of buffalo meat powder during storage of 120 days at ambient temperature
