

CONTENTS

	Title	Page No.
Chapter 1	General Introduction	1-38
Chapter 2	Instrumental Methods and Theory.....	39-62
Chapter 3	Synthesis and physico-chemical studies of polyazamacrocyclic complexes of few first row transition metal divalent ions	63-79
Chapter 4	Template synthesis of polyazamacrocyclic complexes of Mn(II), Co(II), Ni(II), Cu(II) and Zn(II) derived from pyridine-2,6-dicarboxylic acid and their characterization	80-93
Chapter 5	Metal template synthesis of diamidediimine macrocycles and their spectrochemical studies.....	94-107
Chapter 6	Metal assisted synthesis of mixed nitrogen-sulfur donor set.....	108-118
Chapter 7	Synthesis of hexaaza schiff base macrocyclic complexes and their physico-chemical properties.....	119-135
Chapter 8	Metal ion promoted synthesis of pentaazamacrocyclic complexes derived from 2,6-diaminopyridine.....	136-149
