ACKNOWLEDGEMENTS

It is matter of great pleasure and honour to present this work which owes its existence to my respected supervisor Dr. Qamar A. Naqvi, Associate Professor, Department of Botany, Aligarh Muslim University, Aligarh whose guidance, encouragement and sympathetic attitude were immensely helpful throughout the present research work.

I am particularly indebted to Prof. Khalid Mahmood, the founder of Plant Virology in the Department of Botany for his encouragement. He was kind enough to go through the manuscript and sparing his valuable time for me.

I also wish to express my sincere thanks to Prof. Zaka-ur-Rab, Director, Institute of Agriculture, Aligarh Muslim University, Aligarh.

I am also greatly indebted to Prof. M. Wajid Khan, Chairman and his predecessors Prof. Saeed A. Siddiqui and Prof. Wazahat Hussain, Department of Botany, Aligarh Muslim University, Aligarh for providing necessary laboratory facilities in Botany Department.

I am thankful to Dr. I.D. Garg, Senior Scientist, C.P.R.I. Shimla for providing antisera and for his generous help and support whenever needed. I also wish to thank the Director, Central Tabacco Research
Institute, Rajamundary, for supplying the seeds of different tabacco varieties.

I am greatly indebted to Dr. Naheed Banu, Associate Professor Department of Biochemistry, A.M.U., for her encouragement, generous help and support whenever needed.

I am highly thankful to my lab. colleagues for their co-operation and assistance during the course of present research work. I am also thankful to my friends and well-wishers for their support and encouragement.

The University Grant Commission, New Delhi is also gratefully acknowledged for financial assistance. I would like to extend my thanks to Mr. Pradeep Sharma for word processing in time.

I am earnestly grateful to my parents and all other family members, without their support it was not possible to complete this work.

(Devendra Singh)
