

ACKNOWLEDGEMENTS

I would like to express my deep sense of gratitude towards my Ph.D supervisors, Prof. Alimuddin, Department of Applied Physics, Aligarh Muslim University, Aligarh, India and Dr. Ravi Kumar, Materials Science Division, Inter-University Accelerator Centre, New Delhi, India. During my course of Ph.D work they have lightened my knowledge and way of thinking about the problems through their useful suggestions and discussions. The affable discussions with them gave me better understanding towards thesis problem particularly on magnetism. The completion of this thesis owes their constant support, keen interest and deep involvement. I learnt a lot from them and consider myself to fortunate enough for having them as my research supervisors.

I express my deepest gratitude to Dr. Amit Roy, Director, IUAC, New Delhi, India for extending the access of experimental facilities, his constant help and support in many other forms during my Ph.D duration. And it is my great pleasure to extend my regards and thanks to Dr. D. K. Avasthi, Dr. D. Kanjilal and Dr. Sandeep Chopra from IUAC, New Delhi, India.

I express profound regards and thanks to Prof. Rajendra Prasad, Prof. K. M. Lal, Prof. Afzal Ahmad, Prof. Alim Hussain Naqvi, Prof. Javed Hussain, Prof. J. P. Srivastava, Dr. Shakeel Khan. Dr. M. K. Bhardwaj, Dr. Ameer Azam, Dr. M. A. Suhail, Dr. Mohd. Chaman and to all academic and non-academic staffs from the Department of Applied Physics, Aligarh Muslim University for their constant support and help during thesis work.

I am grateful to Prof. Ajay Gupta, Dr. V. R. Reddy, Dr. Alok Banerjee and Dr. D. M. Phase from UGC-DAE, Consortium for Scientific Research, Indore, India for their invaluable suggestions, discussions and extending unconditional and sensible help in characterizations.

I take this opportunity to express my deepest gratitude to my senior Dr. Ramjanay Choudhary for his constant encouragement, moral support and many fruitful suggestions during the course of this work. I am very

much thankful to him for his many valuable suggestions in manuscript preparations as well as in understanding the subject.

I articulate my sincere thanks to Mr. V. V. Siva Kumar, Dr. Ambuj Triphathi, Dr. Fouran Singh, Mr. Pawan Kularia, Mr. Saif Khan and Mrs. Indira Sulania from the materials science group, IUAC, New Delhi, India for their help and cooperation time to time during this work. I extend my sincere thanks to Dr. C. P. Safvan and Mr. Sugam Kumar from IUAC, New Delhi for the fruitful discussions, suggestion and help in computer automation of the instruments using the Labview programe. I also transmit my sincere thanks to Mr. Rajesh Kumar, Mr. R. N. Dutt, Mr. S. K Suman and S. K. Saini from IUAC, New Delhi, for their constructive ideas during the instrument developments presented in this thesis.

I wish to express my special thanks to the Pelletron Group at IUAC for providing a sustained beam and good atmosphere during all the irradiation experiments. And I sincerely thank all employees of IUAC, academic and administrative, for their help and cooperation whenever it was required. I also extend my acknowledgement toward everyone from the workshop of IUAC for their help during my experimental needs.

My sincere thanks are due towards my seniors Dr. Anjana Dogra, BARC, Mumbai, Dr. Surender Kumar Sharma, University of Campinas, Brazil, Dr. Mohd. Wasi Khan, Dr Sikander Ali and Dr. Rajesh Kumar from Aligarh Muslim University, Aligarh for their enlightening ideas, comments and suggestions during this work. Special thanks to my labmates Mr. Dinesh Shukla, Mr. N. E. Rajeevan, Mr. Prabhjot Singh, Mr. Abhinav Pratap, Mr. Khalid Mujassam Batto and Mrs. Devki Chauhan for their support and help, whenever it was needed. One of my lab mate Mr. A. M. M. Farea, who has always been to my side to help me out by any way, is no more with us, he passed away at the final stage of this thesis on 25/12/2007. I owe my deep gratitude towards his invaluable friendship.

Completion of this work is due to the strong support from my lab mates and following friends from IUAC, New Delhi, Aligarh Muslim University, Aigarh and from different universities of India namely Yashpal Singh Katheria, Prashant Vats, Ajay Kumar Mahour, S. D. Kausik, C. S.

Yadav, Sandeep Malik, Dinesh Chandra Aggarwal, Vikas Baranwal, Hardev Singh, Manvendra Kumar, Mr. Ajay Kumar, Amit Panwar, Yogendra Kumar Mishra, Dinesh Negi, Ranjit Karn, Abhishek Gupta, Rahul Singhal, Praveen D Shidling, Dr. Vinay Dhiman, Parvez Ahamad Alvi, Ashad Ali, Isarial, Mamata Gupta, and Meena Mishra. I am fortunate to have all these buddies as my friends who have been always with me with their strong support in my personal as well as in academic life. They all deserve my special thanks for making my life cheerful, enjoying moment with these friends are memorable.

I am grateful to Inter-University Accelerator Centre (UFUP-Project), Council of Scientific and Industrial Research (CSIR), Department of Science and Technology and Indian National Science Academy (INSA) for providing financial assistance.

None of this would have been possible without the constant support and encouragement of my parents, sister, brother, sister in-law relatives and well-wishers throughout. I am really at the lost of words to express my obligation to my parents who have supported me all through, and allowing me smoothly with my work. This thesis owes most to them. At this moment I very much remember with gratitude my sister, Sudha Gautam and brothers, Mr. Arvindra Gautam, Mr. Yogendra, Mr. Devendra, Ravendra and Umesh who always insisted on giving my research work as the first priority and encouraged me to produce my best. I thank each and every one who has helped me at some stage or the other in making thesis possible. On completion of this thesis, I miss very much my mother Mrs. Jagvati Gautam, who is no more by my side to share my moment of joy. I dedicate this thesis to the sacred memory of my mother.
