LIST OF TABLES

Table 1  Antioxidants of human body fluids  
Table 2  Production of Cu(I) from serotonin-Cu(II) interaction.  
Table 3  Degradation of calf thymus DNA by L-DOPA, serotonin, melatonin and tryptophan in the presence of Cu(II) as measured by the degree of S1 nuclease digestion.  
Table 4  Sensitivity of bacteriophage T4 to serotonin, melatonin and tryptophan in the presence of Cu(II).  
Table 5  Effect of oxygen radical quenchers on the viability of bacteriophage T4 after treatment with serotonin in the presence of Cu(II).  
Table 6  Degradation of bovine serum albumin (BSA) by L-DOPA, serotonin, melatonin and tryptophan in the presence of Cu(II).  
Table 7  Modification of bovine serum albumin (BSA) by serotonin, melatonin, tryptophan and L-DOPA in the presence of Cu(II) and determination of the reducing capacity of the modified BSA.  
Table 8  Effect of serotonin, melatonin and tryptophan on hydroxyl radical generation by Fe(II)-EDTA system.  
Table 9  S1 nuclease hydrolysis of calf thymus DNA treated with serotonin in the presence of different metal ions.  
Table 10 Effect of serotonin, melatonin and tryptophan on copper mediated lipid peroxidation in rat brain mitochondria.
