ACKNOWLEDGEMENTS

Any research work is quite impossible without the support of many experts and professionals contribution and my thesis is not an exception. First and foremost among them, undoubtedly, is my supervisor, philosopher and menter Dr. Satya Prakash Srivastava, Asstt. Director and Head, Instrument Section and Analytical Chemistry Division, Industrial Toxicology Research Centre, Lucknow, who has been a constant source of inspiration to me. His inestimable guidance, paternal love, healthy criticism, clearcut ideas, an uncanny ability to look beyond the obvious and an untiring urge to fathom the depths of science have often left me in awe and in turn provided me with the sagacity to go beyond myself. I consider myself singularly fortunate to have, had the opportunity to work under his able guidance and enriching myself from his vast sea of knowledge I offer very sincerest and candid regard for him.

I am also thankful to Dr. Wajid Hussain Ansari, Reader, Department of Chemistry A.M.U., Aligarh, who as my supervisor has always been happy to render any help that I required.

I wish to extend my thankfulness to Dr. P.K. Seth, Sr. Asstt. Director, I.T.R.C., Lucknow for his unfailing support and encouragement.
