ACKNOWLEDGEMENTS

I must express my sincere thanks to my supervisor Dr. Azhar Kazmi, Professor of Business Administration and Chairman, Department of Business Administration, Aligarh Muslim University, Aligarh (India), for his continuous interest, personal guidance, encouragement, and moral support during the entire period of my stay at A.M.U., Aligarh. Without his generous help, the researcher would never have been able to join this research project and to complete the study. The time spent on reading, checking, and making suggestions by him during the progress of this study can not be reciprocated.

I am thankful to my course teachers Professor Najmul Hasan and Mr. Kaleem Mohd. Khan, Reader and other faculty members of the Department of Business Administration, A.M.U, for their cooperation and valuable suggestions provided to me in this work. The help and inspiration rendered by Mr. Jamsheed A. Siddiqui, Mr. Mijanur Rahman and other researchers of the same department, are also thankfully acknowledged. The cooperation received from the non-teaching officers and staff of the departmental office also deserves high appreciation.

I am appreciative of the financial support provided by the Government of India, and study leave granted by the Government of Bangladesh for the entire period of study. Besides, I am grateful to all those persons and organisations who have provided information about study and facilitated my field survey in Bangladesh and India.
Mrs. Zeba Kazmi deserves my best compliments and gratitude for her sister-like encouragement in study and suggestions during times of homesickness as I have stayed away from my country for a period of about four years. I am indebted to Mr. Md. Abdul Hossain, Research Scholar, Department of Physics, A.M.U., and his wife, Mrs. Parvin Akhter, who have always extended their sympathetic cooperation in many ways—especially during my difficult days at Aligarh. Others who have shown keen interest and helped me in this venture include Dr. Kausar Mustafa, Mr. Rejuan Hossain Bhuiyan, both from Dhaka University, Mr. Md. Hafizur Rahman, research Scholar in Physics, A.M.U., Mr. Md. Almech Ali, Research Scholar in Statistics, A.M.U., Aligarh and Mr. A.J.M. Saleh, Research Scholar in Philosophy, A.M.U., Aligarh and Mr. S.M. Monzur Murshed (Duke), M.Sc. Biochemistry student, A.M.U. I am thankful to all of them. All members of Bangladeshi Students' Association of A.M.U. have given me their love, affection, and association during the entire period at Aligarh. I express my heartiest thanks to them.

I must express my gratitude to Professor Md. Hanif, Principal, B.M. College, Barisal, who had pioneered my college education that helped me to enter into the realm of academia. I owe gratitude to Mr. Abdus Salam, Associate Professor of Management, B.M. College, Barisal, Mr. Abdus Salam Howalder, Lecturer in Accounting, of the same college, Mr. Md. Wazih Ullah, Rtd. Govt. Officer, Barisal, Mr. Md. Bashir Ahmed of Chittagong, Mr. Md. Ismail of Dhaka, and my brother Mr. Md. Hamidul Haque, who have taken due care of my family at Barisal. I should acknowledge the inspiration and moral support of my teachers, friends, peers, and students that stimulated me in this pursuit. I must convey gratefulness to my friend Mr. Md. Maksudur Rahman, now
residing in U.S.A., whose friendly but strong guardianship helped in successful completion of my university study at Chittagong.

My deepest thanks goes to my ailing father and mother whose affection and sacrifice in my cause can never be compensated. My elder sister Mrs. Rizia Begam always showed keen interest in my study and helped me in different ways. I convey my heartfelt thanks to her. Finally, I am grateful to my wife, Raju children Saiful and Poly, and other younger brothers and sisters, whose cordial love and affection stimulated me in doing this work.

I am thankful to Mr. Shujaat Ali for carefully and neatly typing this thesis.
