ACKNOWLEDGEMENTS
ACKNOWLEDGMENTS

Man is instinctively born inquisitive and his powerful instinct has been to know more and more about the world and his own body. Modern medical science is the sum total of the continuity of researches made over hundreds of years by the most eminent men of science. These great masters, who were truly the pioneers in their fields, delved deep into mysterious of the human body. Blessed indeed are those pioneers who for a batter and healthier living of man, have been whole-heartedly dedicating their lives, at the cost of their personnel comfort and easy to the fulfilment of the mission of their lives. One of such living pioneer is Prof.Dr. Mahdi Hasan (FNA) founder director, INTERDISCIPLINARY BRAIN RESEARCH CENTRE (IBRC), J.N.Medical College, A.M.U., Aligarh, who is respectfully regarded as an intellectual giant amongst one of the most eminent man of science, not only in India but also in the most progressive countries of world where science have made great strides. His masterly grasp of the subject under study, his efficiency as one of the most competent and successful teacher and his thought-provoking researches have reverently endeared him to one and all. It has been indeed my sheer good luck to learn a little from him and to have been blessed with his guidance based on his vast knowledge and wide experience of three decades. But for his unstained guidance and almost fatherly help, it would have not been possible for me to submit this thesis, because his timely and spontaneous encouragement came to my rescue many a time when despondency loomed large over me.

To Dr. Syed Ashfaq Nabi, Reader, Department of Chemistry, A.M.U., Aligarh. I owe a deep sense of gratitude for his assistance and guidance as supervisor for the completion of this research work. His dynamic personality,
ability, knowledge and experience as scientist have been of a greater assessment to lighten my path. I honestly admit it that as it is my pride of being his pupil. I shall always be obliged and grateful to him throughout my life and future generations.

I am immensely thankful to Prof. Dr. (Mrs.) Shamim Jahan Rizvi, Director, I.B.R.C., who has been a soul source of inspiration and encouragement to me throughout the course of this study. Her academic brilliance never ceased to amaze me and I shudder at the thought of listing her infinite and diversify achievements both as a teacher and researcher. Once again, I am very much grateful and indebted to her for her keen interest, excellent guidance and critical suggestions during the course of my doctoral research work. I acknowledge with a great sense of pride the privilege of having been guided by Dr. Fakhrul Islam, Senior Lecturer, Department of Elementology and Toxicology, Jamia Hamdard, New Delhi. His invaluable suggestions were of great help to me during the course of this investigations.

I have no words to express my deep gratitude to my respected father, who sacrified his everything for my studies and academic pursuits right from my childhood. But for his unstinted, ever willing, spontaneous and tireless efforts, I could have never reached the present stage of presenting this thesis. My mother who has been always with me, mentally and emotionally, in giving sacrifices, moral support, constant encouragement and patience. My younger brothers, Dr. Amir, Dr. Abid and sister Amra, deserve my thanks for their affectionate obedience during the preparation of my thesis.

I convey my respectful thanks to my grand mother and uncles for their blessings and affectionate exhorations which inspired and invigorated me to complete this thesis.
I shall be failing in my duties, if I forget to express my thanks to my best friend and research colleague Mr. Ishrat Jamil, who inspired and assisted me to join the I.B.R.C., he always proved himself as a pathfinder to me in research and in practical life. His versatile personality, caliber, modesty and way of handling the matter will always remain a matter of pride to me, to I.B.R.C. and to A.M.U.

My colleagues Dr. Yagana Bano, V. Ramesh, Farooq (Parvaz), Nusrat, Uzma and Abid deserve my thanks for their friendly nice suggestions, co-operation and words of encouragement during the preparation of the present work. I gratefully acknowledge the financial assistance granted to me by the Council of Science and Technology, Lucknow, without which preparation of this thesis would have not been possible.

Prof. Aziz Khan, Department of Community Medicine, J.N. Medical College, Aligarh, deserve my special thanks for his kind help in the all important statistical analysis of the experimental data.

I am immensely grateful to Abul Kalam Azad (Computer Professional) M/s Exclusive Computer Centre, 10-Champion Market, Aligarh, for preparing the manuscript to my satisfaction.

Finally, I fall short of adequate words in expressing my thanks to my fiancee for her moral support and encouragement.

(Kunwar Asif)
