ACKNOWLEDGEMENT

Given the liberty of voice I would have liked to opine that 'Acknowledgement' serves the tradition or convention more than gratitude per se. I would have become happier than ever had I been able to express my respect and gratitude in appropriate words to my supervisor Professor A. Salahuddin, Ex-chairman, Department of Biochemistry, J.N. Medical College. I have the ecstasy and pleasure to reciprocate my boundless indebtedness to Prof. A. Salahuddin, who is a real scientist and a true teacher with a soft core in a shell of apparent rigidity. I am proud to have the opportunity to work under the caring and scholarly guidance of a teacher who had dedicated his life for the Chemistry of life that is biochemistry.

That biochemistry can be applied in terms of clinical medicine was the lesson imparted by respectable Dr. M. Ahmad, my co-supervisor, Professor of Medicine, J.N. Medical College, through his helpful suggestions. I have no words to tender my gratitude towards him.

Hon'ble Professor Rashid Ali, Chairman, Department of Biochemistry, J.N. Medical College, who was everaffectionate, inspiring, everactive with never ending patience had been generous enough to extend every sort of help needed to complete my thesis including laboratory facilities.
I am also grateful to Dr. Wajid Ali Naqvi, Mrs. Jamila Siddiqui, Dr.(Mrs.) Shehla Moonis Raza and Dr. A. Qasim, who had given affectionate anchorage and valuable opinions in the crucial junctures.

I am much delighted to avail this opportunity of placing on record my hearty thanks and indebtedness towards Ph.D. scholars Mrs. Renu Tyagi, Miss. Najma Ali, Mrs. Naushin, Mrs. Khustar Salman, Miss. Parveen Salahuddin, Mr. Krishnan Hajela, Mr. Muzaaffar Mir, Mr. Khalid Majid Fajili for their kind cooperation and encouraging suggestions at every stage of my work in every possible ways. The days of their close association and friendly feeling will be a cherished treasure in my memory.

My thanks are extended towards the research scholars, Miss. Seema Hasan, Miss Zia Afros Hasan, Miss Sabiha, Mrs. Zoya Galzie and Miss. Azra Abid for their kind and timely available valuable helps and friendly gestures.

I like to convey my heartfelt thanks to Mr. Aziz Khan, Reader, Department of Community Medicine, who helped me in statistical evaluation of the data of my work with great enthusiasm and sincerity.

It is difficult to express my indebtedness to my roommate Tamal, who was a constant source of inspiration and drive behind me and infused moral boost and courage in my tense and depressing moments.
My thanks are due for all my friends and colleagues particularly, Bhabani, Chayan, Pranesh, Subroto, Tushar and Tapasda whose individual contribution can hardly be reciprocated in mere words.

All the non-teaching staff of our department, particularly Lal Mohammad and Kapil deserve special mention because of their laborious contributions with smiling face.

I am thankful to Mr. U.D. Sharma, Mr. Aslah Uddin and Mr. Majid Ali Khan of Clinical laboratory for their sincere cooperation in my laboratory work.

Last but not the least I have the pleasure to solicit my thanks towards Mr. Q. Javed and Mr. Allay Imam, without whose help the thesis could not have been captivated in the chains of printed letters and graphs to see the light of the day.
