ACKNOWLEDGEMENTS

It gives me great pleasure to record my humble gratefulness to my supervisor, Dr. Masood Ahmad, for his excellent guidance, sound criticism and encouragement throughout the course of this investigation. He painstakingly initiated me into the field of Microbial Genetics with consummate skill and nurtured in me the ability for independent work. His magnanimous generosity and unflagging interest helped me in all my endeavours.

I am thankful to Prof. A.M. Siddiqi, Chairman Department of Biochemistry and Dean, Faculty of Life Sciences, Aligarh Muslim University, Aligarh for providing necessary facilities.

My special thanks are due to Prof. M. Saleemuddin for his keen interest and constant encouragement which especially helped me in completing this task.

Thanks are also due to Drs S.M. Hadi, B. Bano and N. Banu for their help and valuable suggestions.

I owe a great debt to all my friends and colleagues particularly to Drs Javed Musarrat, Qayyum Husain for their amicable help and cooperation.
I gratefully record the untired patience of my wife, Kausar, who has always been a source of undiminished encouragement, sustenance and delightful distraction. She has right for every word of praise.

I have no words to express my feelings about my parents, sisters and brother for their benediction, moral support and every thing else.

I am also highly thankful to my kids, Anjum and Altamash for their keen interest, patience, forbearance and above all who also remain a strong source of inspiration during the entire execution of this study.

The Council of Scientific and Industrial Research (India) is gratefully acknowledged for providing financial support.
