3.4 Ion exchange isotherm of Sr\(^{2+}\) ion on Amberlite IRC-718.

3.5 Ion exchange isotherm of Cu\(^{2+}\) ion on Amberlite IRC-718.

3.6 Ion exchange isotherm of Pb\(^{2+}\) ion on Amberlite IRC-718.

3.7 Ion exchange isotherm of Mg\(^{2+}\) ion on Amberlite IRC-718.

3.8 Ion exchange isotherm of Hg\(^{2+}\) ion on Amberlite IRC-718.

3.9 Ion exchange isotherm of Mn\(^{2+}\) ion on Amberlite IRC-718.

3.10 Ion exchange isotherm of Fe\(^{3+}\) ion on Amberlite IRC-718.

3.11 Ion exchange isotherm of Ag\(^{+}\) ion on Amberlite IRC-718.

3.12 Normalized plots of selectivity coefficients vs equivalent fractions of Mg\(^{2+}\) ion in exchanger phase.

3.13 Normalized plots of selectivity coefficients vs equivalent fractions of Ba\(^{2+}\) ion in exchanger phase.

3.14 Normalized plots of selectivity coefficients vs equivalent fractions of Sr\(^{2+}\) ion in exchanger phase.

3.15 Normalized plots of selectivity coefficients vs equivalent fractions of Ca\(^{2+}\) ion in exchanger phase.

3.16 Normalized plots of selectivity coefficients vs equivalent fractions of Fe\(^{3+}\) ion in exchanger phase.
3.17 Normalized plots of selectivity coefficients vs equivalent fractions of Hg$^{2+}$ ion in exchanger phase.

3.18 Normalized plots of selectivity coefficients vs equivalent fractions of Cu$^{2+}$ ion in exchanger phase.

3.19 Normalized plots of selectivity coefficients vs equivalent fractions of Pb$^{2+}$ ion in exchanger phase.

3.20 Normalized plots of selectivity coefficients vs equivalent fractions of Mn$^{2+}$ ion in exchanger phase.

3.21 Normalized plots of selectivity coefficients vs equivalent fractions of Ni$^{2+}$ ion in exchanger phase.

3.22 Normalized plots of selectivity coefficients vs equivalent fractions of Ag$^{+}$ ion in exchanger phase.

3.23 Plots of ln Ka vs 1/T for alkaline earth metal ions.

3.24 Plots of ln Ka vs 1/T for transition metal ions.

4.1 Ion exchange isotherm of Mg$^{2+}$ ion on Duolite ES-467.

4.2 Ion exchange isotherm of Ca$^{2+}$ ion on Duolite ES-467.

4.3 Ion exchange isotherm of Ba$^{2+}$ ion on Duolite ES-467.

4.4 Ion exchange isotherm of Sr$^{2+}$ ion on Duolite ES-467.

4.5 Ion exchange isotherm of Cu$^{2+}$ ion on Duolite ES-467.
4.6 Ion exchange isotherm of Pb$^{2+}$ ion on Duolite ES-467.

4.7 Normalized plots of selectivity coefficient vs equivalent fraction of Pb$^{2+}$ ion in exchanger phase.

4.8 Normalized plots of selectivity coefficient vs equivalent fraction of Cu$^{2+}$ ion in exchanger phase.

4.9 Normalized plots of selectivity coefficient vs equivalent fraction of Mg$^{2+}$ ion in exchanger phase.

4.10 Normalized plots of selectivity coefficient vs equivalent fraction of Sr$^{2+}$ ion in exchanger phase.

4.11 Normalized plots of selectivity coefficient vs equivalent fraction of Ba$^{2+}$ ion in exchanger phase.

4.12 Normalized plots of selectivity coefficient vs equivalent fraction of Ca$^{2+}$ ion in exchanger phase.

4.13 Plot of ln Ka vs $1/T$ for alkaline earths, Cu$^{2+}$ and Pb$^{2+}$ ions.

5.1 Rate of exchange of Cu$^{2+}$ on Amberlite IRC-718.

5.2 Effect of an interruption on the rate of Cu$^{2+}$ - Na$^{+}$ exchange on Amberlite IRC-718.

5.3 Rate of exchange of Cu$^{2+}$ at different temperatures on Amberlite IRC-718.

5.4 Rate of exchange of Pb$^{2+}$ at different temperatures on Amberlite IRC-718.

5.5 Rate of exchange of Mg$^{2+}$ at different temperatures on Amberlite IRC-718.

5.6 Rate of exchange of Ba$^{2+}$ at different temperatures on Amberlite IRC-718.
xi

5.7 Rate of exchange of Ca\textsuperscript{2+} at different temperatures on Amberlite IRC-718.

5.8 Rate of exchange of Sr\textsuperscript{2+} at different temperatures on Amberlite IRC-718.

5.9 Influence of particle size on the rate of Cu\textsuperscript{2+} - Na\textsuperscript{+} exchange at 30°C on Amberlite IRC-718.

5.10 Effect of temperature on the rate of Ba\textsuperscript{2+} - Na\textsuperscript{+} exchange on Amberlite IRC-718 at particle radius = 0.0175 cm.

5.11 Effect of temperature on the rate of Mg\textsuperscript{2+} - Na\textsuperscript{+} exchange on Amberlite IRC-718 at particle radius = 0.0175 cm.

5.12 Effect of temperature on the rate of Sr\textsuperscript{2+} - Na\textsuperscript{+} exchange on Amberlite IRC-718 at particle radius = 0.0175 cm.

5.13 Effect of temperature on the rate of Pb\textsuperscript{2+} - Na\textsuperscript{+} exchange on Amberlite IRC-718 at particle radius = 0.0175 cm.

5.14 Effect of temperature on the rate of Ca\textsuperscript{2+} - Na\textsuperscript{+} exchange on Amberlite IRC-718 at particle radius = 0.0175 cm.

5.15 Effect of temperature on the rate of Cu\textsuperscript{2+} - Na\textsuperscript{+} exchange on Amberlite IRC-718 at particle radius = 0.0175 cm.

5.16 Effect of particle size on the rate of exchange for Cu\textsuperscript{2+} - Na\textsuperscript{+} on Amberlite IRC-718.

5.17 Plot of B vs 1/r\textsuperscript{2} for Cu\textsuperscript{2+} at 30°C.

5.18 Plot of time vs X (eq g) from moving boundary method for Na\textsuperscript{+} - Sr\textsuperscript{2+} exchange at different temperature at particle radius = 0.0175 cm.

5.19 Plot of time vs X (eq 9) from moving boundary method for Na\textsuperscript{+} - Ca\textsuperscript{2+} exchange at different temperature at particle radius = 0.0175 cm.
5.20 Plot of time vs X (eq 9) from moving boundary method for Na\(^+\) - Mg\(^{2+}\) exchange at different temperature at particle radius = 0.0175 cm.

5.21 Plot of time vs X (eq 9) from moving boundary method for Na\(^+\) - Ba\(^{2+}\) exchange at different temperature at particle radius = 0.0175 cm.

5.22 Plot of time vs X (eq 9) from moving boundary method for Na\(^+\) - Pb\(^{2+}\) exchange at different temperature at particle radius = 0.0175 cm.

5.23 Plot of time vs X (eq 9) from moving boundary method for Na\(^+\) - Cu\(^{2+}\) exchange at different temperature at particle radius = 0.0175 cm.

5.24 Plot of T vs t for Ca\(^{2+}\) - Na\(^+\) exchange at different temperatures on Amberlite IRC-718 under the condition of particle diffusion.

5.25 Plot of T vs t for Cu\(^{2+}\) - Na\(^+\) exchange at different temperatures on Amberlite IRC-718 under the condition of particle diffusion.

5.26 Plot of T vs t for Mg\(^{2+}\) - Na\(^+\) exchange at different temperatures on Amberlite IRC-718 under the condition of particle diffusion.

5.27 Plot of T vs t for Pb\(^{2+}\) - Na\(^+\) exchange at different temperatures on Amberlite IRC-718 under the condition of particle diffusion.

5.28 Plot of T vs t for Sr\(^{2+}\) - Na\(^+\) exchange at different temperatures on Amberlite IRC-718 under the condition of particle diffusion.
