LIST OF FIGURES xvii
LIST OF ABBREVIATIONS xx
I. INTRODUCTION 2
II. EXPERIMENTAL 69
   A. Materials 69
      1. Proteins 69
      2. Reagents used for sodium dodecyl sulphate polyacrylamide gel electrophoresis 69
      3. Chromatographic Media 69
      4. Reagents used in the isolation of lymphocytes and membrane protein 70
      5. Miscellaneous Reagents 70
   B. Methods 71
      1. Preparation of solutions 71
         (a) Preparation of Giemsa stain 71
         (b) Preparation of Folin-phenol reagent 72
         (c) Preparation of copper reagent 72
         (d) Preparation of Coomassie brilliant blue stain 72
         (e) Preparation of solutions for silver stain 73
         (f) Preparation of affinity columns 73
2. pH measurements 74
3. Optical measurements 75
4. Determination of Protein concentration 75
5. Ion Exchange Chromatography 76
6. Gel filtration chromatography 78
7. High Performance liquid chromatography 80
8. Sodium dodecyl sulphate polyacrylamide gel electrophoresis 81
9. Estimation of neutral hexoses and detection of sialic acid 83
10. Estimation of inorganic phosphate 85
11. Assay of 5'-nucleotidase activity in membrane fraction 85
12. Isolation of immunoglobulin and its derivatives 86
13. Isolation of lymphocytes from goat blood 87
14. Isolation of lymphocyte membrane 90
15. Detection of IgG binding protein on goat lymphocytes by the binding of FITC conjugated IgG 90
16. Isolation of lymphocyte membrane IgG binding protein 93
17. Affinity chromatography of lymphocyte membrane IgG binding protein on concanavalin A Sepharose 4 B gel 95
18. Interaction of cell surface immunoglobulin binding protein with immunoglobulin and its derivatives 96

III. RESULTS

1. Isolation of lymphocytes from goat blood 98
2. Detection of IgG binding protein on lymphocyte surface 100
3. Isolation of lymphocyte membrane IgG binding proteins.
   (a) Isolation of IgG binding protein from whole cells 102
   (b) Isolation of IgG binding protein from the membrane 102

4. Rebinding of FITC conjugated lymphocyte membrane IgG binding protein to the affinity gel. 107

5. Binding of immunoglobulins and its derivatives to intact lymphocytes.
   (a) Effect of pH 109
   (b) Effect of ionic strength 111
   (c) Effect of protein A 111

6. Determination of molecular weight of lymphocyte membrane IgG binding protein by SDS-PAGE 113

7. Glycoprotein nature of lymphocyte membrane IgG binding protein 119

8. Optical properties of lymphocyte membrane IgG binding protein 119

9. Gel filtration behaviour of the lymphocyte membrane IgG binding protein 121

10. Association dissociation behaviour of lymphocyte membrane IgG binding protein. 134
