LIST OF FIGURES

1. Map showing the location of oceanographic sections/stations.
3. Horizontal distribution of sea surface salinity (January-March, 1974)
5. A. Vertical time section for sea water temperature off Cape Comorin (1973, 1974)
5. B. Vertical time section for sea water temperature off Cape Comorin (1975, 1976)
6. B. Vertical time section for sea water temperature off Quilon (1975, 1976)
6. C. Vertical time section for dissolved oxygen off Quilon (1973, 1974)
7. A. Vertical time section for sea water temperature off Cochin (1973, 1974)
7. B. Vertical time section for sea water temperature off Cochin (1975, 1976)
7. C. Vertical time section for seawater temperature off Cochin (1977, 1978)
7. D. Vertical time section for dissolved oxygen off Cochin (1973, 1974)
7. E. Vertical time section for dissolved oxygen off Cochin (1975, 1976)
7. F. Vertical time section for dissolved oxygen off Cochin (1977, 1978)

8. C. Vertical time section for dissolved oxygen off Kasaragod (1973, 1974)

10. B. Vertical time section for sea water temperature off Ratnagiri (1975)

11. A. Diagramatic representation of the extent and duration of vertical tilting of the 23°C isotherm sectionwise/yearwise (Cape-comorin, Quilon, and Cochin- (1973-1978)

11. B. Diagramatic representation of the extent and duration of vertical tilting of the 23°C isotherm sectionwise/yearwise (Kasaragod, Karwar and Ratnagiri (1973-1978)

12. Diagramatic representation of the upwelling velocity (cm/day) off Cape-comorin, Quilon, Cochin, Kasaragod, Karwar and Ratnagiri during the period (1973-1978).

13. A. Relationship between the depth of thermocline, width of thermocline, intensity of thermocline and the vertical stability immediately below the thermocline (average upto 500 m. depth) off Cape-comorin (1974)

13. B. Relationship between the depth of thermocline, width of thermocline, intensity of thermocline and the vertical stability immediately below the thermocline (average upto 500 m. depth) off Quilon (1974)
13. C. Relationship between the depth of thermocline, width of thermocline, intensity of thermocline and the vertical stability immediately below the thermocline (average up-to 500 m. depth) off Cochin (1974)

13. D. Relationship between the depth of thermocline, width of thermocline, intensity of thermocline and the vertical stability immediately below the thermocline (average up-to 500 m. depth) off Kasaragod (1974)

13. E. Relationship between the depth of thermocline, width of thermocline, intensity of thermocline and the vertical stability immediately below the thermocline (average up-to 500 m. depth) off Karwar (1974)

13. F. Relationship between the depth of thermocline, width of thermocline, intensity of thermocline and the vertical stability immediately below the thermocline (average up-to 500 m. depth) off Ratnagiri (1974).

14. Relationship between the spread of thermocline (H) and the stability below the thermocline in the area between Lat. 08°00'N and 17°00'N along the South-west coast of India during June-July-August (1974)

15. A. Relationship between the process of upwelling (in terms of vertical oscillation of 1 ml O2/L isoline and 23°C isotherm) and plankton biomass off Cape-comorin (1973, 1974, 1975).

15. B. Relationship between the process of upwelling (in terms of vertical oscillation of 1 ml O2/L isoline and 23°C isotherm) and plankton biomass off Quilon (1973, 1974, 1975)

15. D. Relationship between the process of upwelling (in terms of vertical oscillation of 1 ml O2/L isoline and 23°C isotherm) and plankton biomass off Kasaragod (1973, 1974, 1975).
15. E. Relationship between the process of upwelling (in terms of vertical oscillation of 1 ml O2/L isoline and 23°C isotherm) and plankton biomass off Karwar (1973, 1974, 1975).

15. F. Relationship between the process of upwelling (in terms of vertical oscillation of 1 ml O2/L isoline and 23°C isotherm) and plankton biomass off Ratnagiri (1973, 1974, 1975).

16. C. Relationship between upwelling, plankton biomass and landings of oil sardine and mackerel during 1975.

17. Relationship between upwelling and landings of oil sardine and mackerel in the area between Tinnevely and Ratnagiri during 1977.
