# List of Figures

1.1 Block diagram of thesis contributions ........................................ 7  
2.1 Complete Spine ........................................................................... 11  
2.2 Axial view of cervical vertebrae .................................................. 13  
2.3 Thoracic vertebra from T1 to T12 ................................................ 15  
2.4 Lumbar vertebra .......................................................................... 15  
2.5 Detailed views of a vertebra and vertebral segment ................. 16  
2.6 Pedicle: Axial view (left) and Lateral view (right) .................... 16  
2.7 Laminae: Axial view (left) and Lateral view (right) ................. 17  
2.8 Spinous Process: Axial view (left) and Lateral view (right) ..... 18  
2.9 Spinal Canal: Axial view (left) and Lateral view (right) .......... 18  
2.10 Facet Joints ............................................................................... 19  
2.11 Axial view of inter-vertebral discs ............................................ 21  
2.12 Nerve structure .......................................................................... 21  
2.13 Ligament Structure ..................................................................... 23  
2.14 Anatomical Planes ...................................................................... 23  
2.15 Movements of vertebral column ................................................ 23  
2.16 Scoliotic spine (Courtesy: KMC, Manipal) ............................... 25  
2.17 Spondylolysis ............................................................................ 35  
2.18 Kyphosis ..................................................................................... 36  
2.19 Ferguson method of spinal curvature measurement ............ 39  
2.20 Greenspan index method ............................................................. 40
5.5 Level-set representation: a circle represented by a level set function and expanded at a uniform speed.

5.6 Automatic grading of apical vertebrae.

5.7 Normal Grading (a) Original Image (b) Segmented Vertebrae (c) Horizontal Lines (d) Pedicle Initialization (e) Segmented Pedicles (f) Pedicle extraction of Apical Vertebra (g) Quantifying axial rotation ($\theta_1 = 38.3 \theta_2 = 36.4 VR = 1.9$).

5.8 Grading +1 (a) Original Image (b) Segmented Vertebrae (c) Horizontal Lines (d) Pedicle Initialization (e) Segmented Pedicles (f) Pedicle extraction of Apical Vertebra (g) Quantifying axial rotation ($\theta_1 = 36.32 \theta_2 = 43.15 VR = 7.17$).

5.9 Grading +2 (a) Original Image (b) Segmented Vertebrae (c) Horizontal Lines (d) Pedicle Initialization (e) Segmented Pedicles (f) Pedicle extraction of Apical Vertebra (g) Quantifying axial rotation ($\theta_1 = 30.96 \theta_2 = 49.55 VR = 19.46$).

5.10 Grading +3 (a) Original Image (b) Segmented Vertebrae.

6.1 Kings classification (A) Type-I (B) Type-II (C) Type-III (D) Type-IV (E) Type-V (Courtesy: American Association of Neurological Surgeons).

6.2 Rule based algorithm for King’s classification [6].

6.3 Block diagram of the extraction of vertebral column.

6.4 Extraction of vertebral column (a) Input image (b) Flipped version of input image (c) Image after arithmetic addition operation (d) Image after thresholding (e) Image after logical AND operation (f) Extracted ROI.

6.5 Original gray level profile with its interpolated version.
6.6 Partial suppression by adding original with interpolation ... 119
6.7 Desired ROI's gray level profiles .............................. 119
6.8 Proposed classification technique using MA and CSL ........ 120
6.9 Type-I (a) Input radiograph (b) Segmented vertebral column
   (c) Extracted boundary (d) Classified as Type-I .............. 121
6.10 Type-IV (a) Input radiograph (b) Segmented vertebral column
   (c) Extracted boundary (d) Classified as Type-IV ............ 122
6.11 Type-III (a) Input radiograph (b) Segmented vertebral column
   (c) Extracted boundary (d) Classified as Type-III ........... 123
6.12 Type-V (a) Input radiograph (b) Segmented vertebral column
   (c) Extracted boundary (d) Classified as Type-V ............ 124
