APPENDIX 1 CONCEPTS

The terms and concepts used in the study are given below.

a) **Fixed Capital** represents the depreciated value of fixed assets owned by the industrial unit/factory as on the closing day of the accounting year. Fixed assets are those which have normal productive life of more than one year. Fixed capital covers all types of assets, new or used or own constructed, deployed for production, transportation, welfare facilities for factory personnel.

b) **Working Capital** is the sum total of all physical inventories owned, held or controlled by the industrial unit/factory as on the closing day of the accounting year such as the materials, fuel and lubricants, stores, semi-finished goods and work-in-progress on account of others and goods made by the industrial unit/factory which are ready for sale. Working capital also includes the cash deposits on hand/in bank.

c) **Productive Capital** is the total of fixed capital and working capital as stated above.
d) **Employees** include those receiving wages and holding supervisor or managerial, ministerial and technical positions engaged in administrative office, sales and distribution, store keeping and welfare sections. Skilled employees include those engaged in supervisory or managerial, ministerial and technical positions. The remaining other employees are unskilled employees.

e) **Value of Production** is defined to include the ex-factory value of products and by-products manufactured during the accounting year. It also includes the net value of semi-finished goods or work-in-progress.

f) **Cost of Production** includes raw material cost, labour cost, operation and maintenance cost, transport and marketing cost, power and fuel cost and other costs.

g) **Small Industry** comprises the small scale industrial units.
